INTRODUCTION

As part of its Tourism Research Program, the Hawai'i Tourism Authority (HTA) maintains a list of properties and units available for visitor accommodations known as the Visitor Plant Inventory (VPI). This report presents the results of an update to the VPI conducted in 2013. It provides data on the number of visitor units, property types, and room classes for the State of Hawai'i and each of its six major islands. Comparison data are provided for four prior years.

The VPI was first published by the Hawai'i Visitors and Convention Bureau (HVCB) in 1964 and has been updated periodically since that time. HVCB did not conduct a survey in 1995 and did not publish hard copies of the report in 1998. The Department of Business, Economic Development and Tourism (DBEDT) published VPI reports annually from 1999 through 2008. HTA has been responsible for annual updates since 2009.

The method for updating VPI begins with a review of the previous year's inventory. Visitor industry agencies (Hawai'i Hotel Association, Hawai'i Visitors and Conventions Bureau, County Planning Departments, island visitor's bureaus, etc.) are surveyed for information they may have on new visitor properties. Extensive internet searches are used to find individual visitor rental units. The master inventory file is updated using these inputs. Representatives of each property in the master file are then surveyed to establish whether the property is available for short-term visitor rental. For each short-term visitor accommodations property, the VPI survey gathers the number of units, types of units, class of units, and other useful information. For further details, see the Methods section in the appendix to this report.

As in previous reports, island and district names were written in proper Hawai'i language orthography. However, individual property names were not written in the same manner unless the words were easily identifiable (i.e., island names).

For your convenience, the 2013 Visitor Plant Inventory report is posted on the HTA website: www.Hawaiitourismauthority.org/research/reports/visitor-plant-inventory/. For further information, contact HTA at (808) 973-2255 or by email at info@Hawaiitourismauthority.org.

The 2013 Visitor Plant Inventory report was produced by SMS Research & Marketing Services, Inc. (SMS) for the Hawai'i Tourism Authority.

PREFACE

In recent years, the formerly steady increase in the size of Hawai'i's visitor plant has fluctuated. The inventory rose in 2009, slightly fell in 2010, rose sharply in 2011, fell in 2012, and fell slightly again in 2013. In the past, deviations from the general trend were the result of significant changes in the number of hotel and condominium units dedicated to visitor use. Since 2006, changes in the inventory reflect changes in the composition of the visitor plant. Hotel units have remained relatively stable and other unit types have contributed more to the rise and fall of total unit counts. First timeshare units and later Individual Visitor Units (IVU) rose quickly. Increases in timeshares and IVUs do not always indicate new construction. Conversions within the visitor inventory add units to one category and subtract units from another¹ and may not produce a rise in total inventory. Conversions from the residential real estate market to visitor plant do produce an increase in the inventory.

Over the last decade, VPI results indicate that, while it is difficult to estimate the number of IVUs accurately, there is little doubt there are more of them². In 2006, there were fewer than 2,400 IVUs in the VPI. By 2011, that number rose to 10,620, an increase of 400 percent in five years. VPI numbers for 2012 and 2013 are lower than the 2011 count but that may be an artifact of the methods used. VPI is an inventory. It requires that we locate individual IVU properties. IVUs are difficult to locate and if a record has no address, no survey can be mailed. Unit owners rarely make addresses available. Some want to avoid calls from potential renters; some may want to stay below the radar because they are operating without the proper paperwork. Other IVU owner/managers are represented by their condo or condo hotel management, an AAO, or a commercial property manager. Others manage their own units but take bookings through an online vacation rental website. All of these make it difficult to get an address for the unit or its owner/manager. Even when we locate an address, IVU surveys have very low response rates.

In 2013, an extensive review of IVU records in the inventory revealed many duplicate entries in the IVU group. The VPI survey also located more units that had been converted to IVUs during the year. More intensive searches of websites and tax records identified hundreds of new units. We strongly suspect that the current count is lower than the actual numbers of IVUs in Hawai'i³. We will continue to work to improve the quality of the count.

The 2013 Visitor Plant Inventory reports a drop in total inventory amounting to 757 units since 2012 (Figure M-1). Most of the change is accounted for by changes to IVU and condominium hotel counts. The finding is consistent with the foregoing discussion of the VPI study experience in 2012. Decreases in condominium hotel counts may have occurred as a result of conversion to IVUs. Decreases in IVUs may have occurred because of the increasing difficulty in confirming IVU status. Difficulty in confirming IVU status was caused by the proliferation of IVUs, the practice of managing units through online vacation rental websites, delays in issuing non-conforming use certificates (NCUs), and other factors.

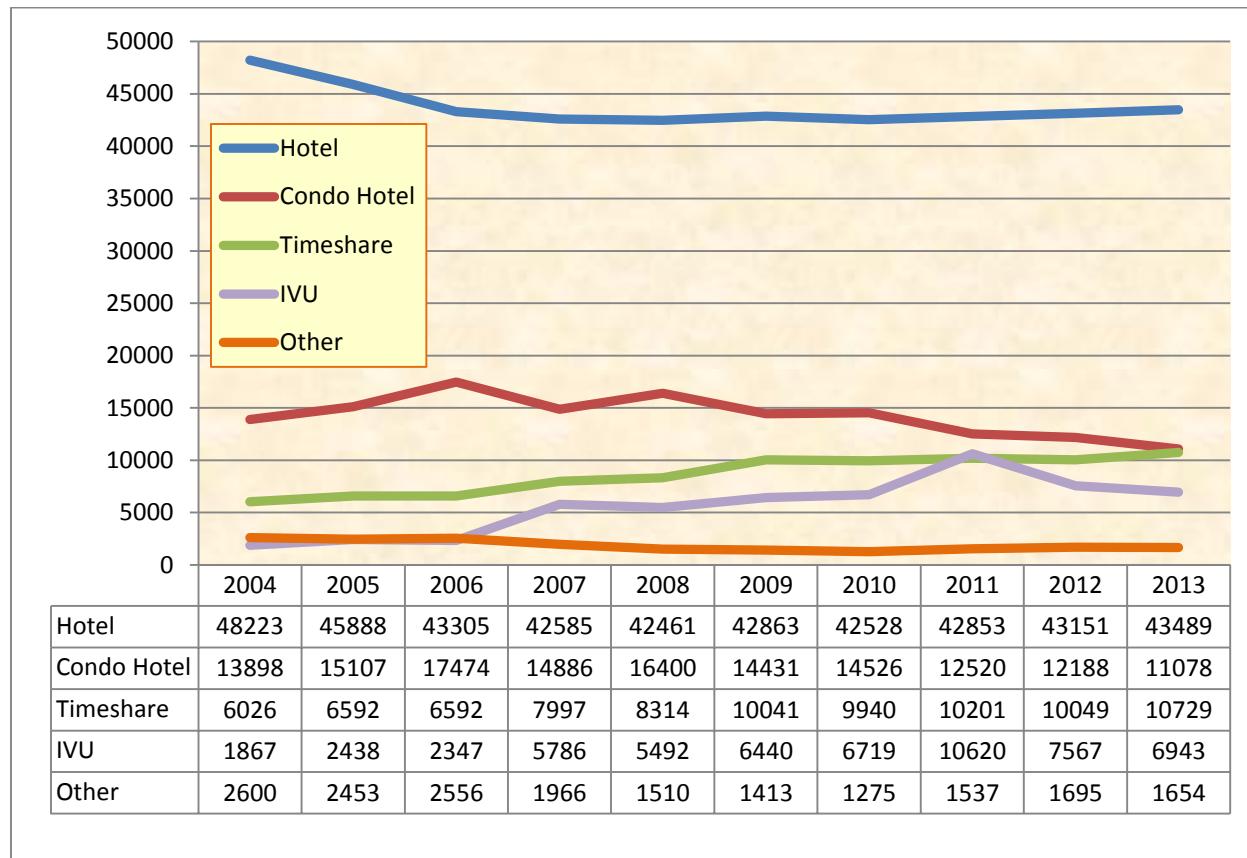

¹ See the discussion of Figure M-1 below.

² The rise in IVU counts may be related to a lag in the supply of traditional visitor accommodations units in the face of increasing demand. Visitor arrivals were up 6.9 percent between 2008 and 2011 and the sum of hotel and condominium hotel units measured in VPI was down 5.9 percent for the same period. Higher hotel room rates coupled with a stagnant residential housing market may prompt property owners to convert residential units to IVUs.

³ An independent study to estimate the number of IVUs in Hawai'i is in progress. Preliminary results suggest that the number is substantially higher than what is recorded in the Inventory.

Figure M-1 shows the Visitor Plant Inventory counts for five major types of visitor accommodations units in Hawai'i for the last ten years.

Figure M-1: Visitor Unit Counts by Type of Accommodations, 2004-2013

Source: Visitor Plant Inventory, 2004-2013.

Between 2004 and 2006, VPI counts show a shift in accommodations marked by decreasing use of hotels and increasing use of condominium hotels. From 2006 through 2009 the major change was a shift from condominium hotels and “other” units to timeshare and IVUs. In 2009, timeshare units leveled off at about 10,000 units statewide and “other” units has remained at about 1,500 to 1,600 units. The IVU counts rose significantly from 2007. The high point in 2011 seems to correspond to a similar decline in condominium hotel units at the same time. The decline in IVUs after 2011, however, is likely the result of a failure of the VPI update work to adequately identify IVUs.

Ultimately, the evidence suggests that there are many more IVUs across the State that are not currently in the VPI. The complexity and changes in stock will require further review and adjustments to data collection procedures in 2014. We note that several other efforts originating outside of the visitor industry are currently being pursued across the State, including legislation proposed for the 2014 Legislative Session and various county initiatives to address the definition and recording of visitor rental units. We have already noted the independent effort to identify IVUs, and the County of Kaua’i’s revision of its tax assessment procedures for 2013-14. In all, the 2014 VPI is likely to report notably higher counts for IVUs.

OVERVIEW

State of Hawai'i

In 2013, the State of Hawai'i visitor plant inventory was comprised of 73,893 visitor accommodations units, about 1% percent lower than the number of visitor units confirmed in the previous year. Significant increases in unit types like apartment hotels (+17.4%) and timeshare units (+6.8%) were offset by decreasing numbers of condominium hotel units (-9.1%) and IVUs (-8%).

About half (48%) of the entire visitor units were located on the island of O'ahu. Other units were located on Maui (24%), Kaua'i (12%), and Hawai'i Island (15%). As was the case in 2012, Moloka'i and Lāna'i had the fewest lodging units.

Hotel units once again comprised the bulk (59%) of visitor accommodations units across the state. Condo hotel units (15%) and timeshares (14%) accounted for the next largest groups of units. IVUs made up about 9 percent of the inventory. The 2013 inventory showed another increase in the number of apartment-hotel units and a continuing drop (-8%) in the number of confirmed IVUs statewide [Figure 2].

The number of properties (1,932) in the State in 2013 has increased by 7.8 percent since 2012. The largest number of properties was found on the Kaua'i (637), followed by Hawai'i Island (544), Maui (442), and O'ahu (276) [Figure 3]. The 2013 counts represented notable growth for Maui (32%), Hawai'i Island (12%), and Kaua'i (14%), which were offset by declines for O'ahu (-25%), Moloka'i (-24%), and Lāna'i (-20%) [Figure 3].

The changes by island were largely the result of changes in the number of confirmed IVU's for 2013. IVUs made up the bulk (73%) of the properties in 2013 and their numbers grew by 17 percent since 2012⁴ [Figure 4]. As noted earlier, the number of confirmed IVUs enumerated in 2013 is likely a significant under-estimate of the total number of IVUs in Hawai'i.

Figure 1: State of Hawai'i – Inventory by Island (Units)

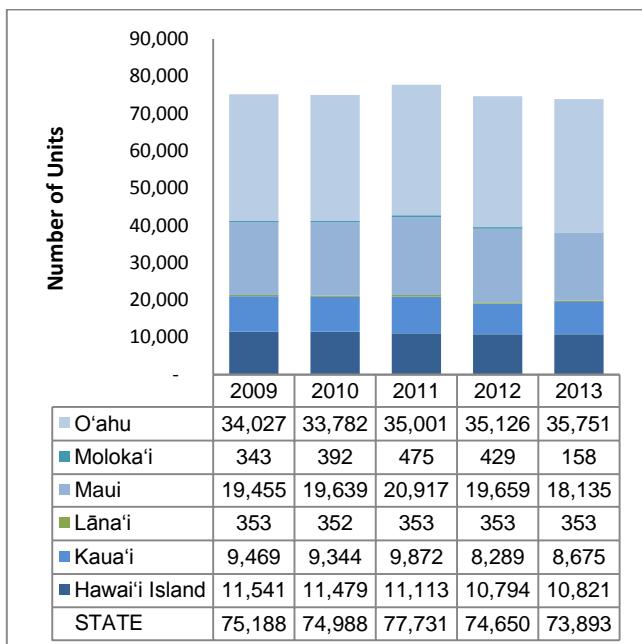

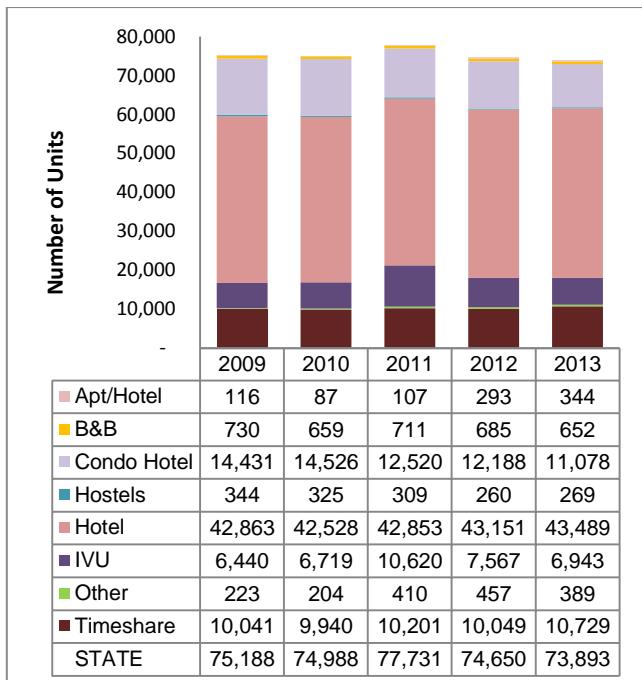

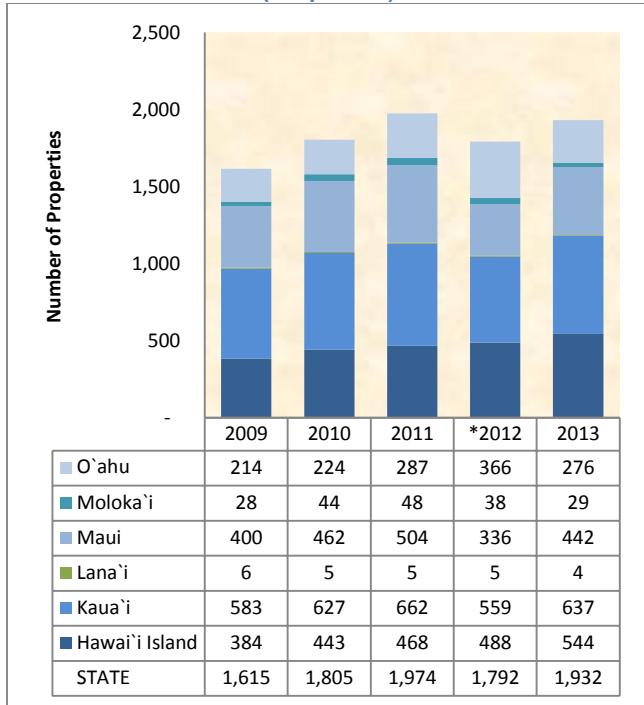

Figure 2: State of Hawai'i – Inventory by Unit Type

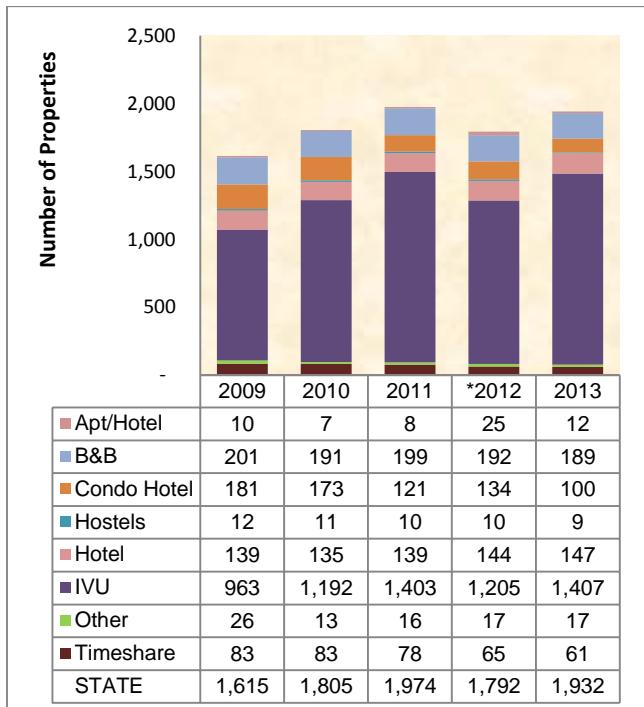

⁴ The profile differences are due to substantial differences in the ratio of units to properties for each type of unit; 293 units per hotel property versus 4.9 units per IVU property.

Figure 3: State of Hawai'i – Inventory by Island (Properties)

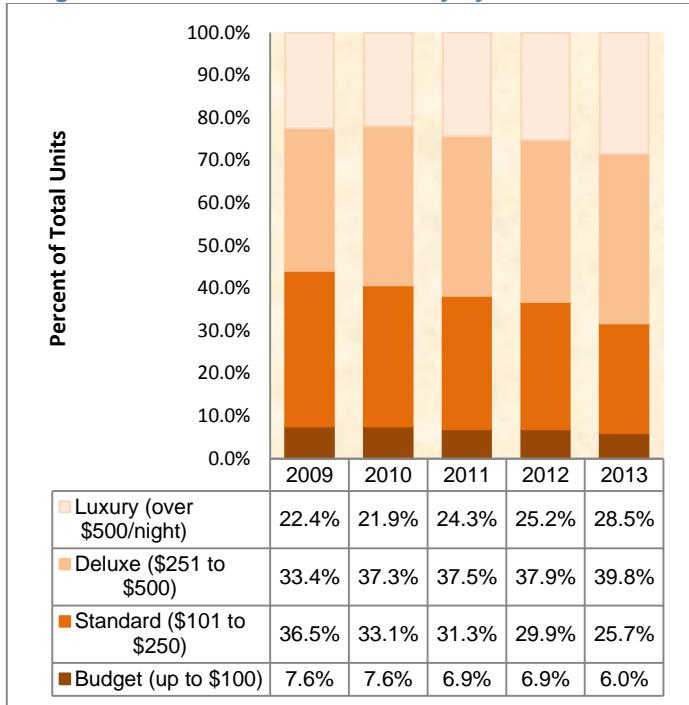

*2012 data was revised

Figure 4: State of Hawai'i – Inventory by Property Type

*2012 data was revised

Figure 5: State of Hawai'i – Inventory by Price Class

The 2013 distribution of units by price class was consistent with the continuing increase in room rates since 2009. Deluxe units accounted for almost 40 percent of all units and luxury units made up more than 28 percent of the inventory [Figure 5]. Based on the survey data, the average room rate across the entire inventory was up 6.3 percent from \$356 in 2012 to \$379 this year.

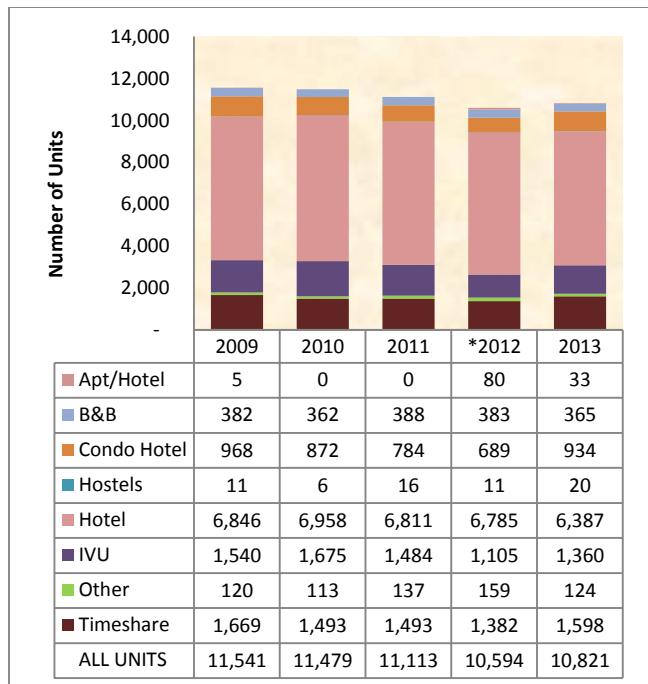

Inventory by Island

Hawai'i Island

The number of confirmed visitor units on Hawai'i Island (10,821) rose 2.1 percent from 2012 to 2013. Several unit types (IVUs, timeshare units, and condo hotel units) saw notable increases in 2013 and others (hotel and “other” units), showed decreases. This was due at least in part to misclassification of units in 2012.

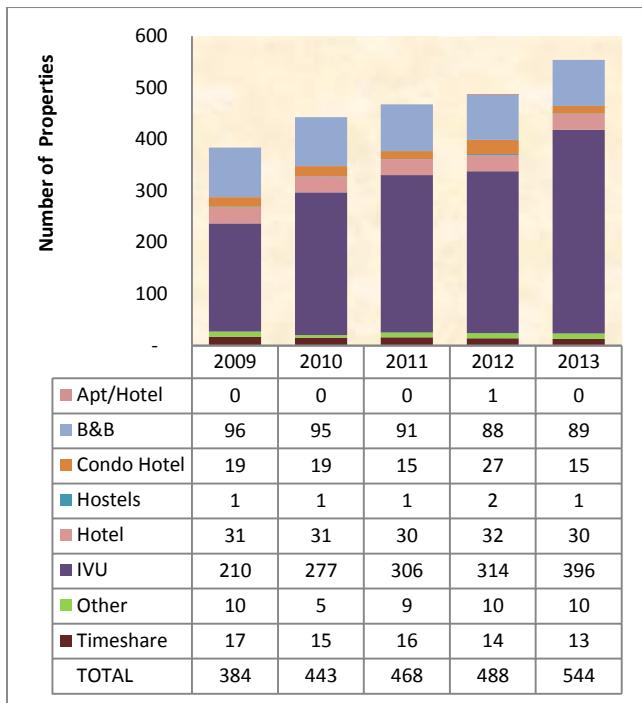

- Hotels accounted for the greatest number of visitor units (6,387), and the third largest property type (30).
- As was the case for most islands, both the number of IVU units and the number of IVU properties rose on Hawai'i Island in 2013. The number of condo hotel units and timeshare units rose while their numbers of properties decreased.
- Data on the distribution of units by price class have been fluctuating in Hawai'i County over the last four years. In 2013, prices increased as luxury units grew to 19 percent of the inventory.

Figure 6: Hawai'i Island – Inventory by Unit Type

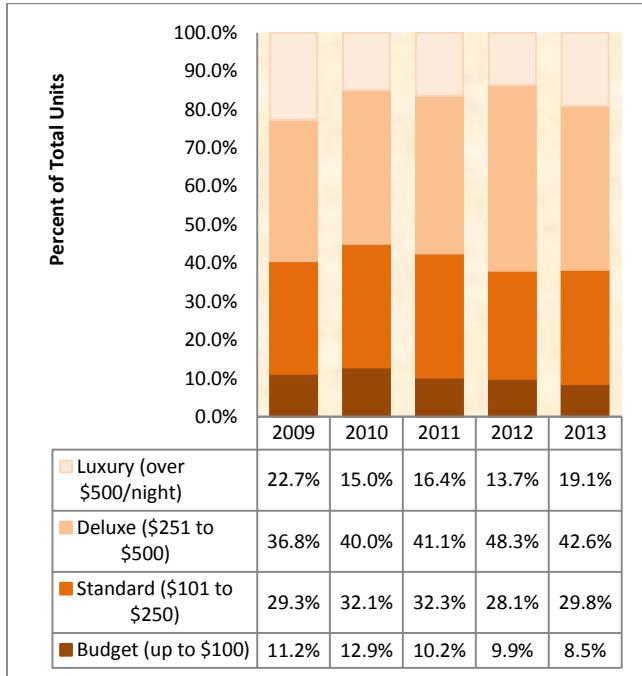

*2012 data revised. Other was revised from 359 to 159.

Figure 7: Hawai'i Island – Inventory by Property Type

There were 33 apartment hotel units and no apartment hotel properties. Units were all found in structures with other types of units. See definition on p. 44.

Figure 8: Hawai'i Island – Inventory by Price Class

Kaua'i

The count of confirmed units on Kaua'i in the 2013 inventory was 8,675 which represented an increase of 4.7 percent over 2012.

- The growth in the inventory was largely due to a 40 percent increase in the number of IVUs and a 14 percent rise in the number of condo hotel units.
- The number of properties increased by 14 percent since 2012, led by an increase of 19 percent in IVU properties.
- The largest percentage of Kaua'i's units remained in the deluxe price class (48%), followed this year by the luxury class units (26%). The percent of inventory in standard and budget classes were both lower this year. This caused visitor accommodations prices to rise by about six percent over last year.

Figure 10: Kaua'i – Inventory by Property Type

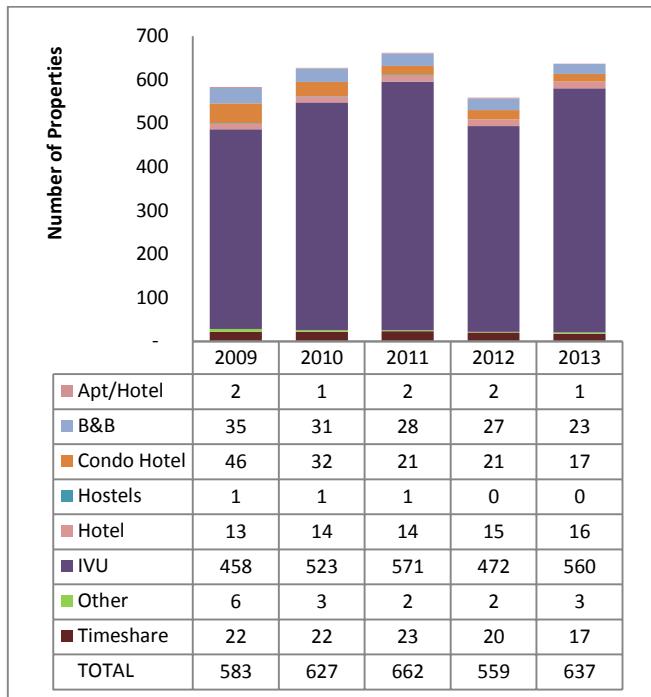

Figure 9: Kaua'i – Inventory by Unit Type

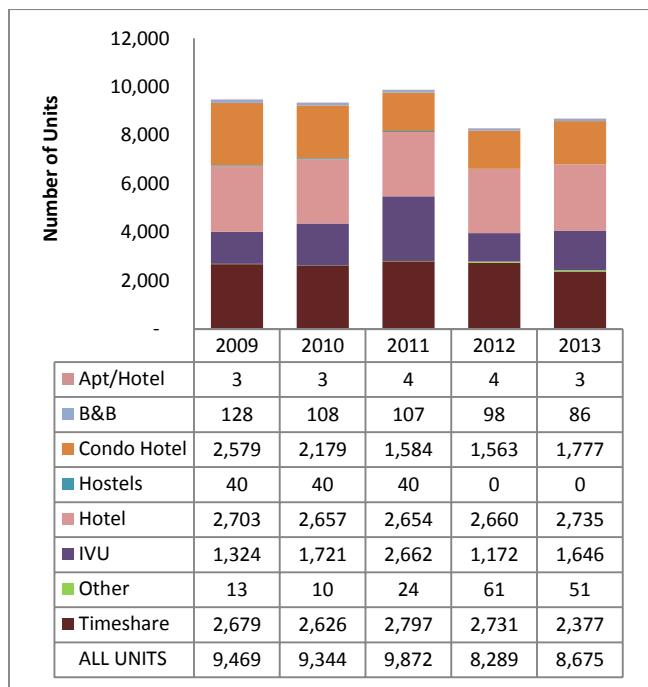

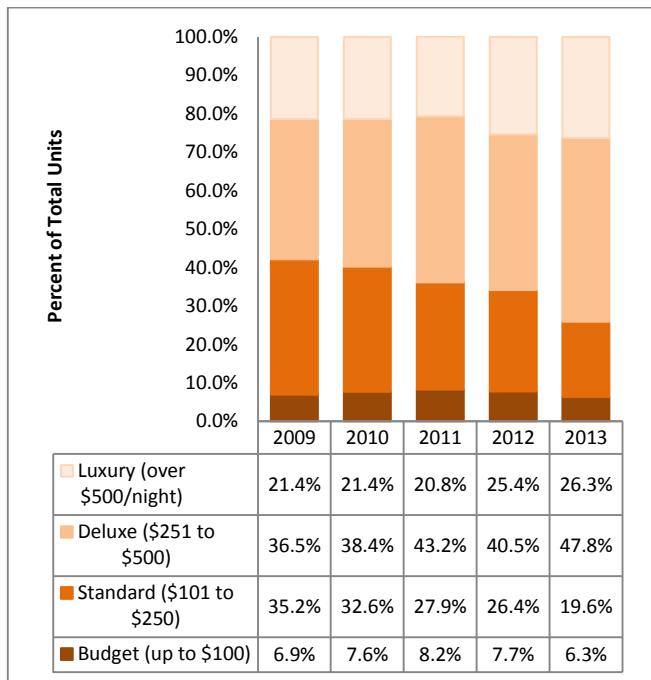

Figure 11: Kaua'i – Inventory by Price Class

Maui

The number of confirmed units on Maui declined 8 percent, from 19,659 in 2012 to 18,135 in 2013. Decreases were encountered for several unit types.

- The number of confirmed IVUs dropped from 3,896 in 2012 to 3,342 a decrease of about 14 percent. The number of confirmed timeshare units was down 14 percent and condo hotel units were down 8 percent. Only apartment hotel and bed & breakfast units increased this year.
- The number of properties was up, however, due primarily to a 59 percent increase in the number of confirmed IVU properties.
- The distribution of units by price class demonstrated a fairly stable structure since 2012. Luxury units dipped slightly and deluxe units rose to 26.4 percent of the inventory. The impact on the estimate average cost per visitor accommodations units was negligible and price remained stable.

Figure 12: Maui – Inventory by Unit Type

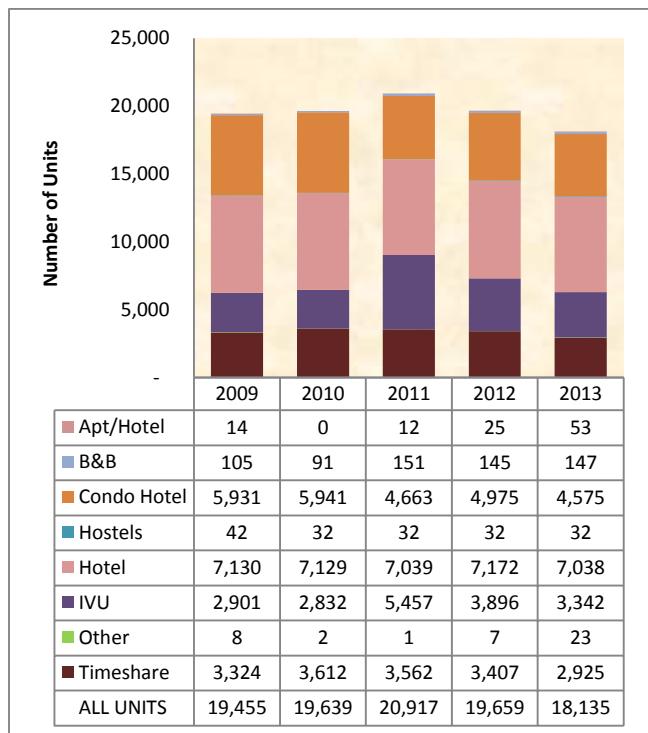

Figure 13: Maui – Inventory by Property Type

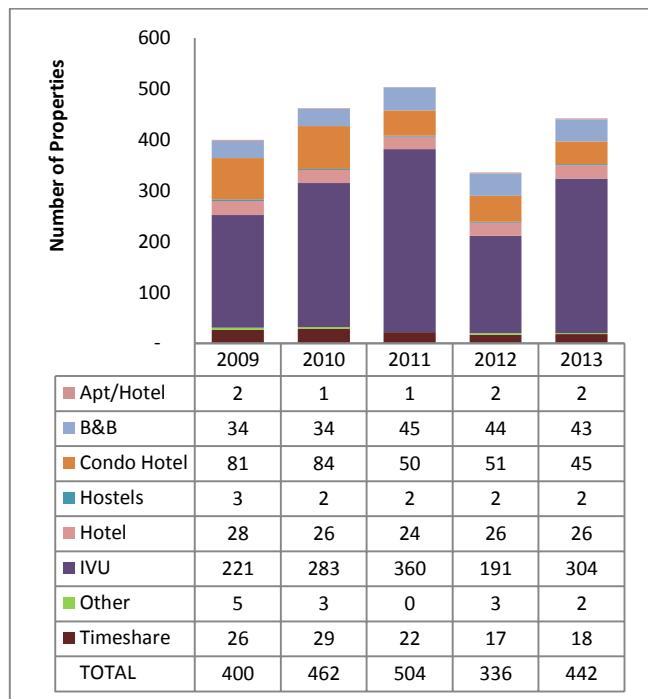

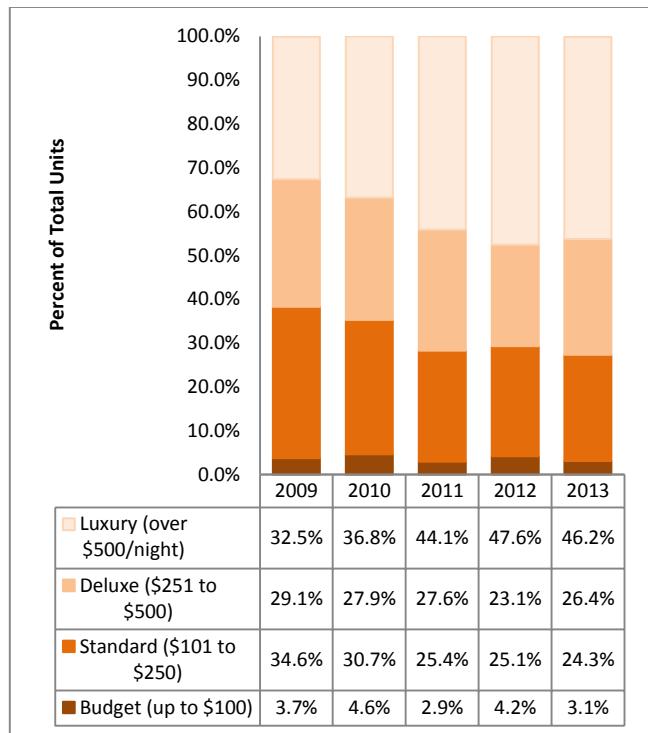

Figure 14: Maui – Inventory by Price Class

Moloka'i

Moloka'i experienced a major decline in the number of visitor accommodations units in 2013. The reduction was greatest in the number of confirmed IVU properties and units.

- The 2013 inventory included an additional 6 apartment-hotel units and an additional 26 condo hotel units. However, the number of IVU units shown in 2011 and 2012 could not be confirmed in 2013. The IVU unit inventory dropped from 339 units to 36 units.
- The number of properties in 2013 (29) was also lower than it was in 2012 (38) owing primarily to a drop in IVU properties.
- The distribution of units by price class found that the largest percentage of Moloka'i visitor accommodations units fell into the standard price class again. In all there was very little change in the price class data.

Figure 16: Moloka'i – Inventory by Property Type

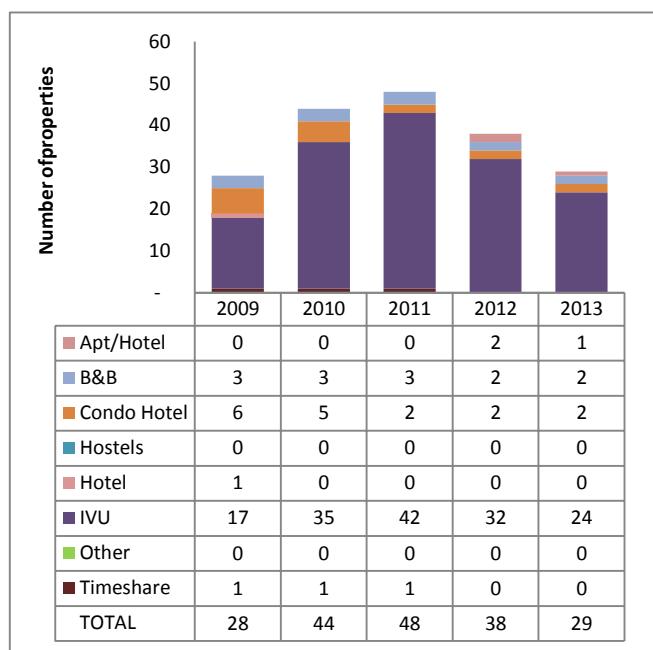

Figure 15: Moloka'i – Inventory by Unit Type

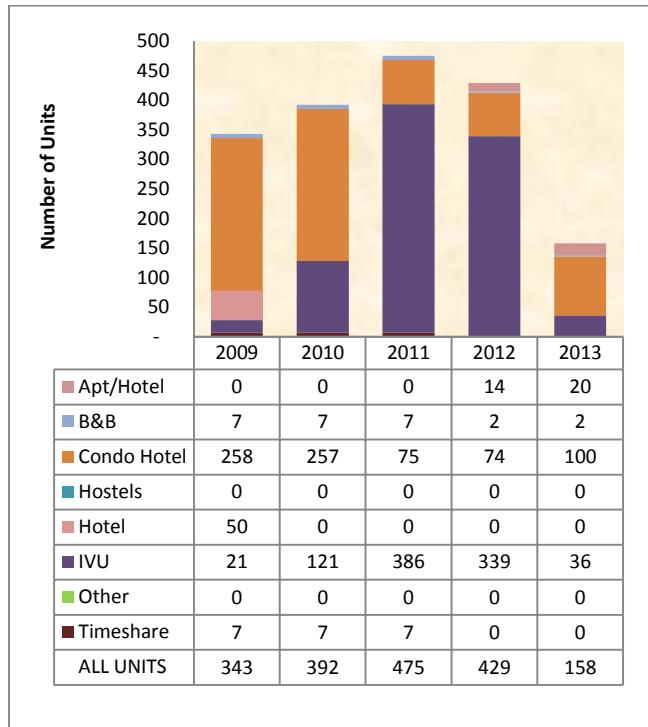

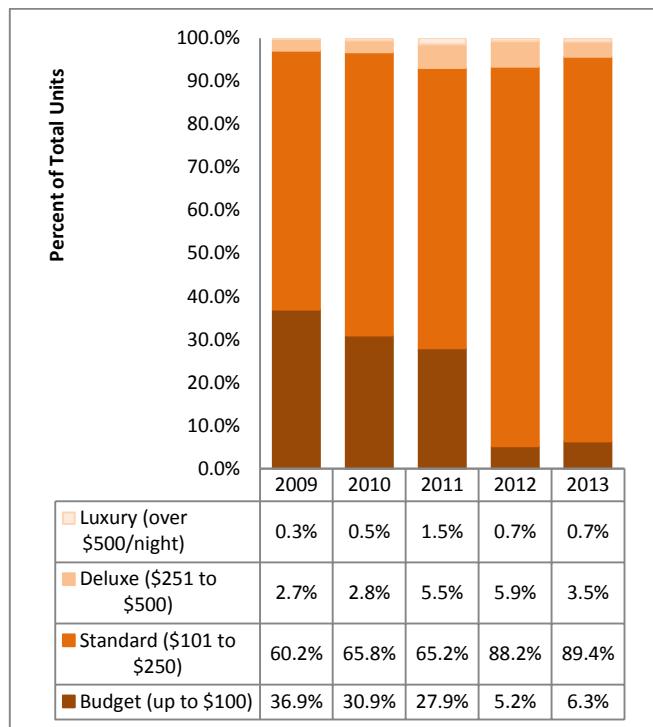

Figure 17: Moloka'i – Inventory by Price Class

Lāna'i

The number of confirmed units on Lāna'i remained constant from the previous year at 353 units.

- Hotels comprised virtually all of the island's units and accounted for almost all the properties.
- The number of units and property types went down by one property and one unit in the apartment hotel category. The totals remained the same for units and properties once again.
- Almost all of the units fell into the luxury or deluxe price class.

Figure 18: Lāna'i – Inventory by Unit Type

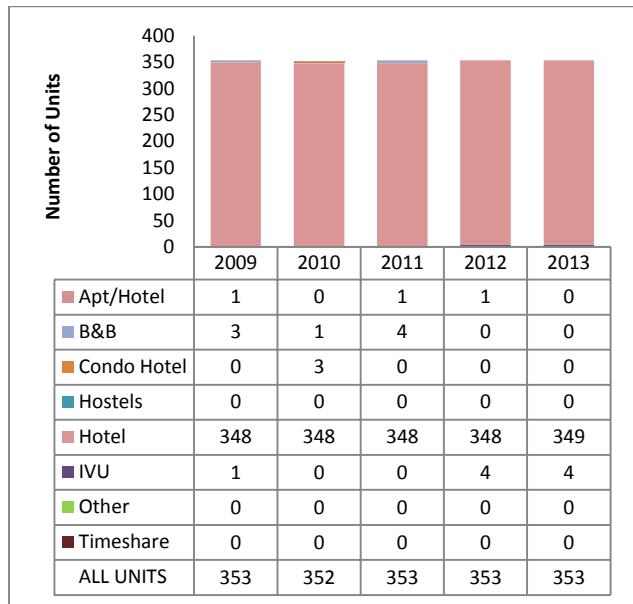

Figure 19: Lāna'i – Inventory by Property Type

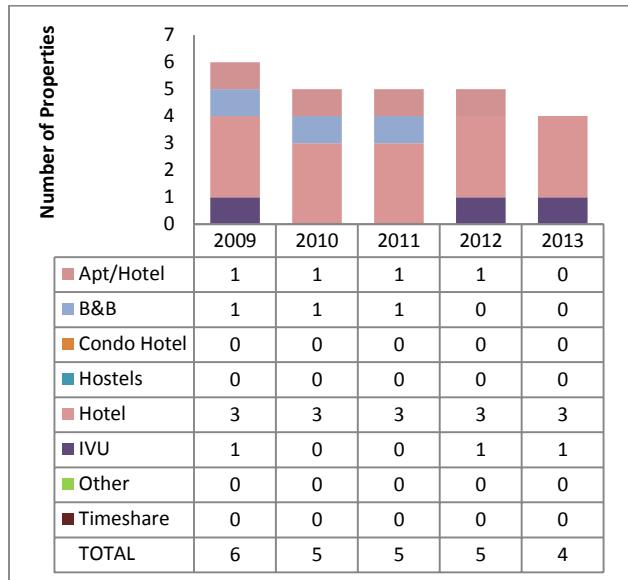

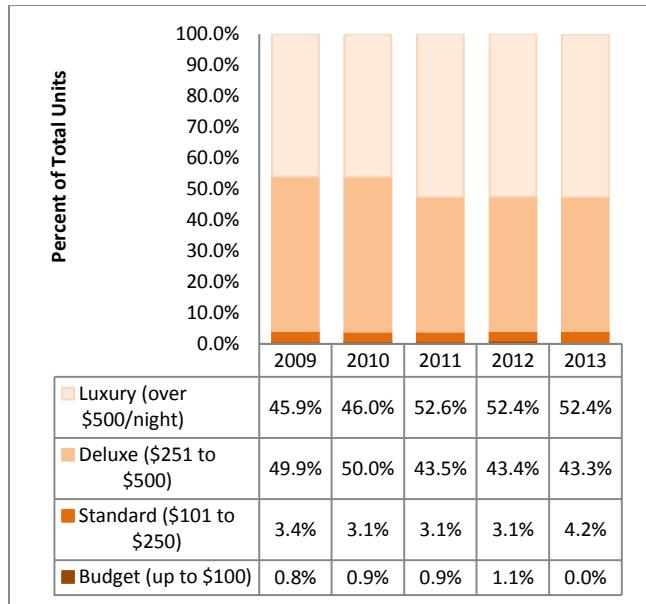

Figure 20: Lāna'i – Inventory by Price Class

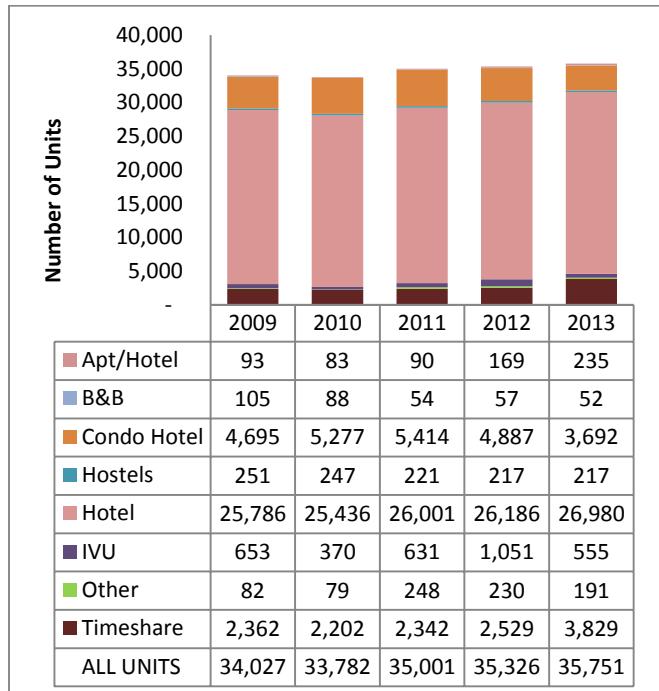

O'ahu

The number of visitor units on O'ahu rose from 35,326 in 2012 to 35,751 in 2013, an increase of 1.2 percent. The number of properties on O'ahu decreased from 366 in 2012 to 276 in 2013. The difference was almost entirely due to a decrease in IVU units.

- The number of condo hotel and IVU units dropped since 2012. The number of properties in each of those categories dropped as well. The lower inventories were associated with difficulties in confirming units that had been identified in the past.
- The number of hotel, apartment hotel, and timeshare units on O'ahu increased notably between 2012 and 2013. The growth in these units offset the continuing decrease in condo hotel units and the apparent losses in IVU units.

Figure 21: O'ahu – Inventory by Unit Type

*2012 data was revised. Other changed from 30 to 230.

Figure 22: O'ahu – Inventory by Property Type

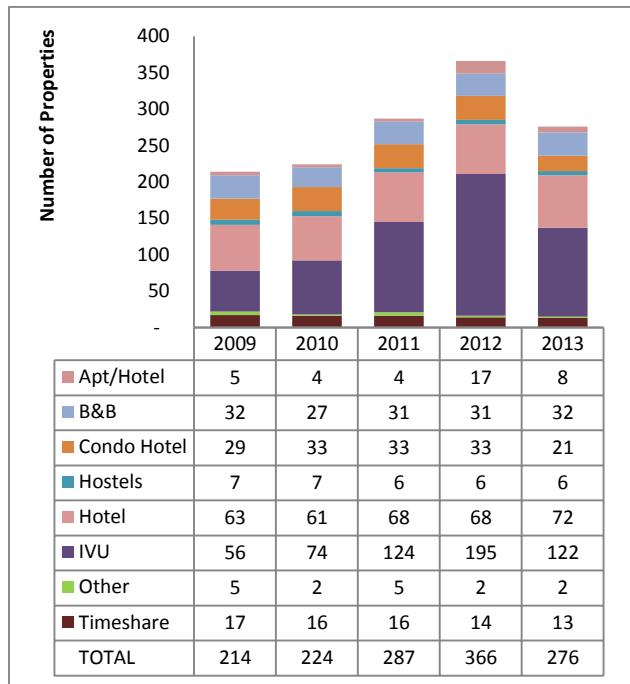

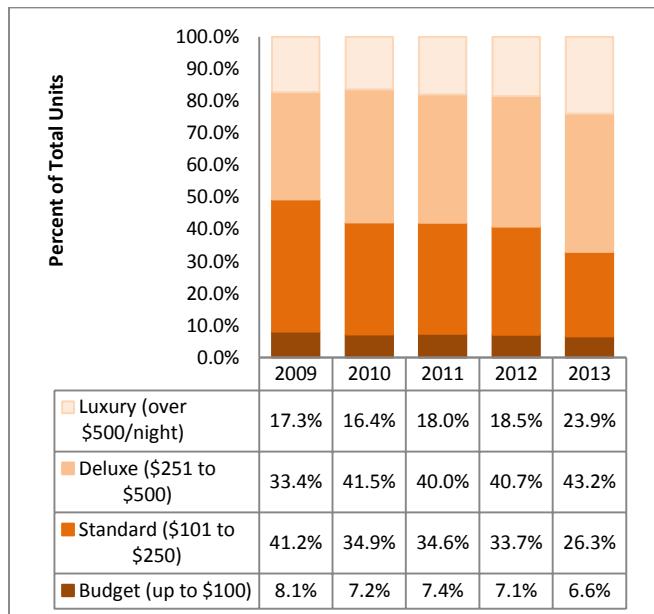

Figure 23: O'ahu – Inventory by Price Class

- O'ahu's inventory by price class showed increases in both luxury and deluxe unit percentages.

Inventory by Type

Hotels

Hotels comprised the largest percentage of visitor units in the State, and O'ahu continued to provide the bulk of these units (62%). Hawai'i Island subtracted 2 hotel properties and Kaua'i added a single hotel property in 2013.

Figure 24: Hotel – Inventory by Island (Units)

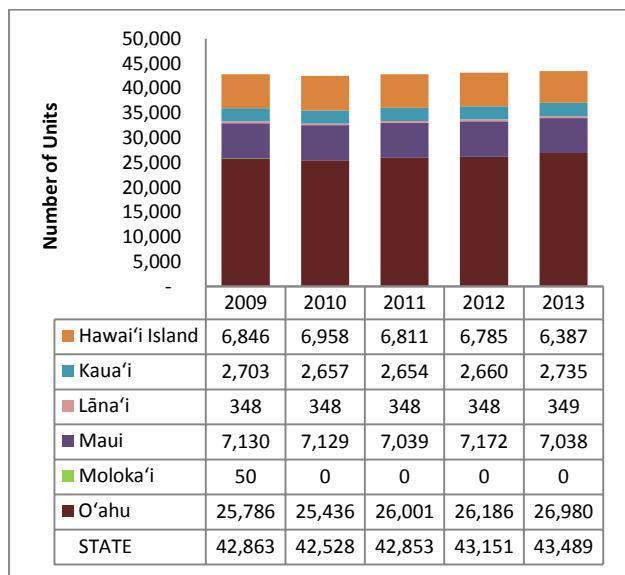

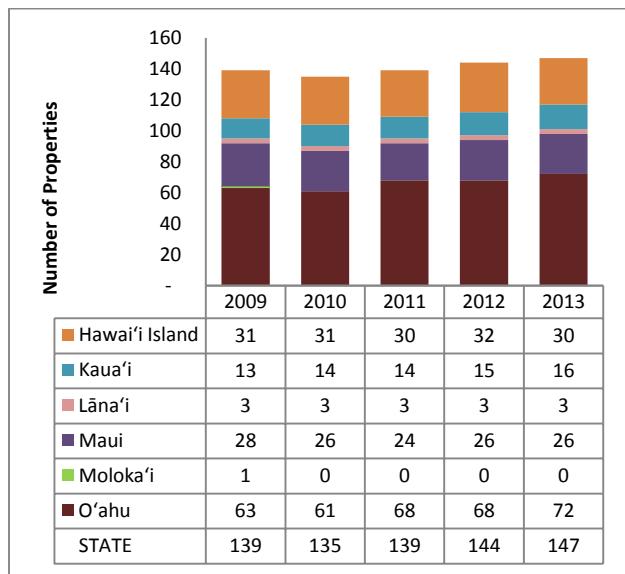

Figure 25: Hotel – Inventory by Island (Properties)

Condominium Hotels

The number of confirmed condo hotel properties declined from the prior year and at the same time the number of overall units decreased. As was the case in 2011, the decrease was due in large part by lower participation in managed rental pools and the reclassification of units from condo hotels to IVUs.

Figure 26: Condo Hotel – Inventory by Island (Units)

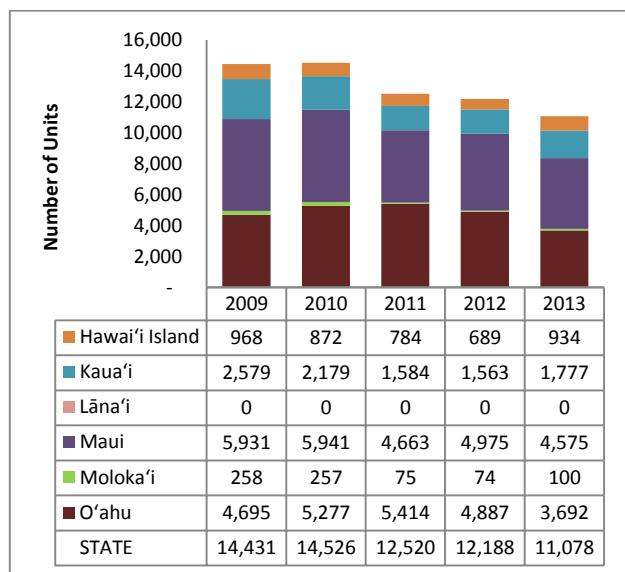

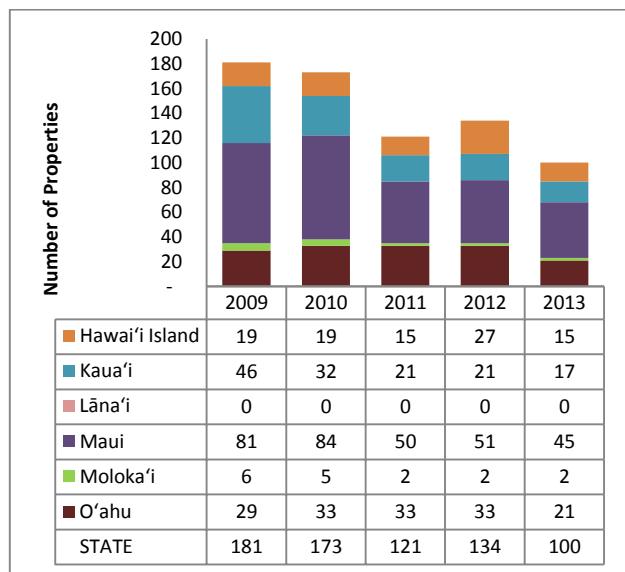

Figure 27: Condo Hotel – Inventory by Island (Properties)

Timeshares

The number of timeshare-classified units increased from 2012 to 2013, principally on Hawai'i Island, and O'ahu. The largest number of timeshare units was listed on O'ahu following continued growth since 2011.

Figure 28: Timeshare – Inventory by Island (Units)

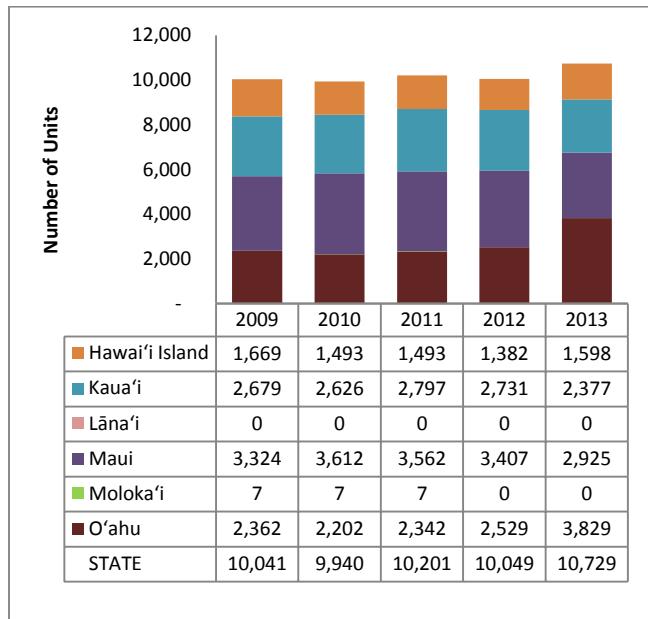

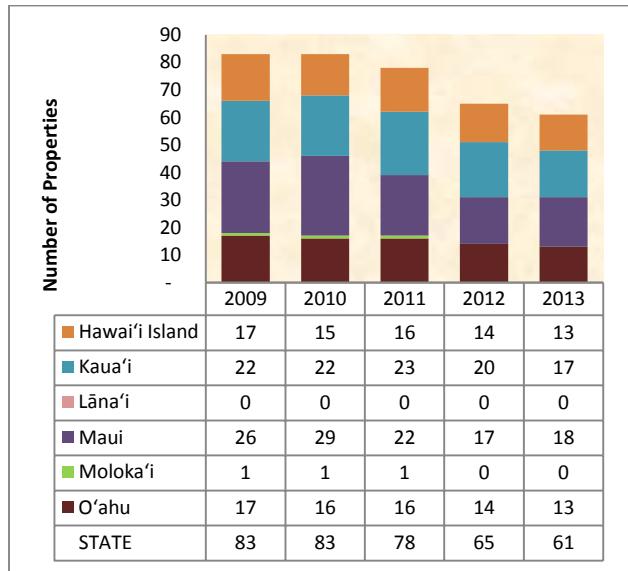

Figure 29: Timeshare – Inventory by Island (Properties)

The number of timeshare properties, on the other hand, has been decreasing since 2011. In 2013 the number of timeshare properties dropped by less than was noted in 2012 (-4 vs. -13).

Individual Vacation Units

IVUs remained the most volatile of the unit types in the inventory. The number of confirmed units dropped from 7,567 in 2012 to 6,943 in 2013. The proliferation of IVUs over time created issues with verification, which in turn accounted for decreases again this year. Our analysis of the Kaua'i data suggested that the number of actual IVUs has increased, but the number of confirmed units declined due to less documentation and reclassification.

Figure 30: IVU – Inventory by Island (Units)

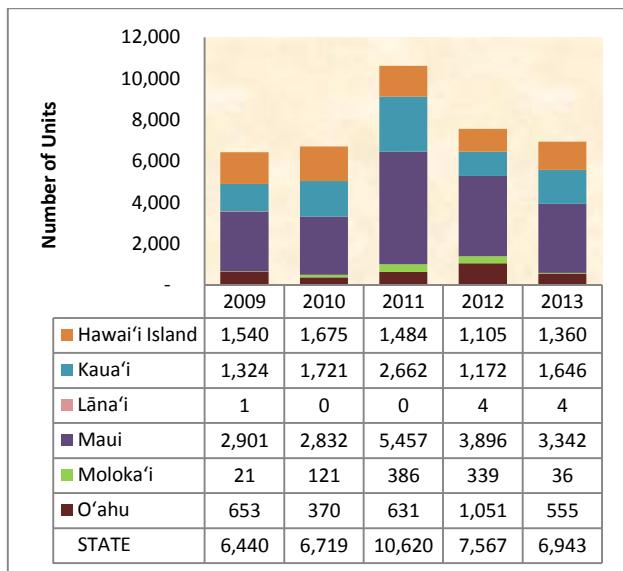

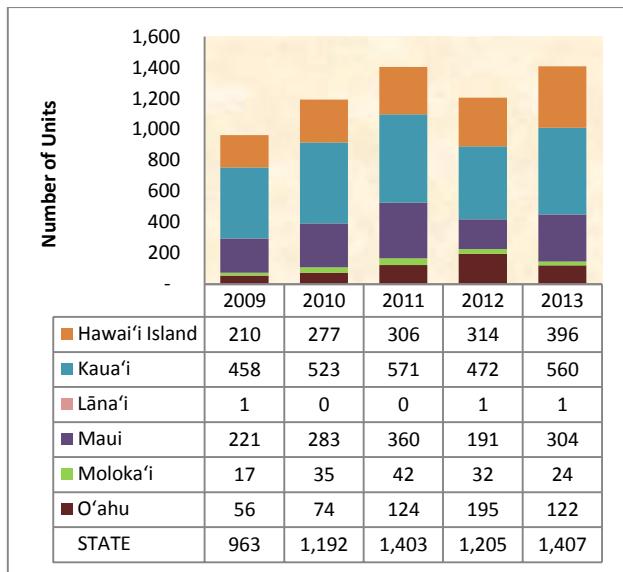

Figure 31: IVU – Inventory by Island (Properties)

Bed & Breakfasts

B&B properties and units declined again between 2012 and 2013, due in part to reductions on Hawai'i Island and Kaua'i. The largest loss was 12 units on Kaua'i.

Figure 32: B&B – Inventory by Island (Units)

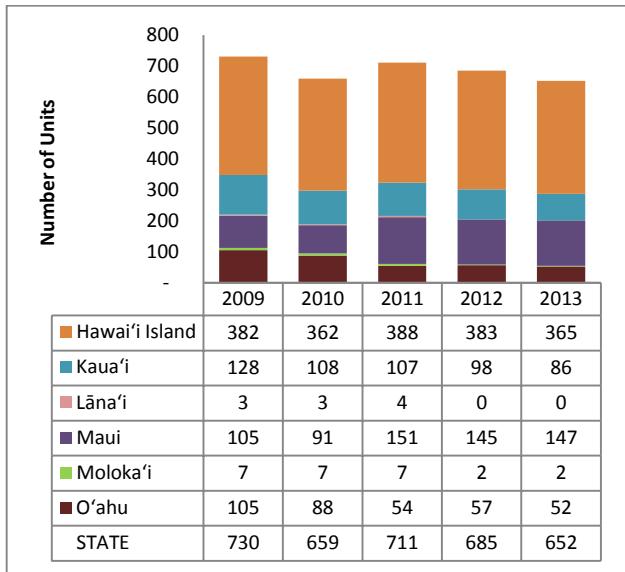

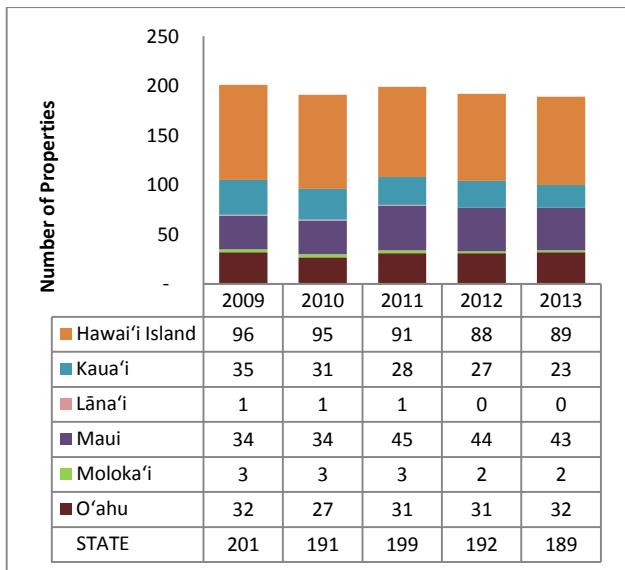

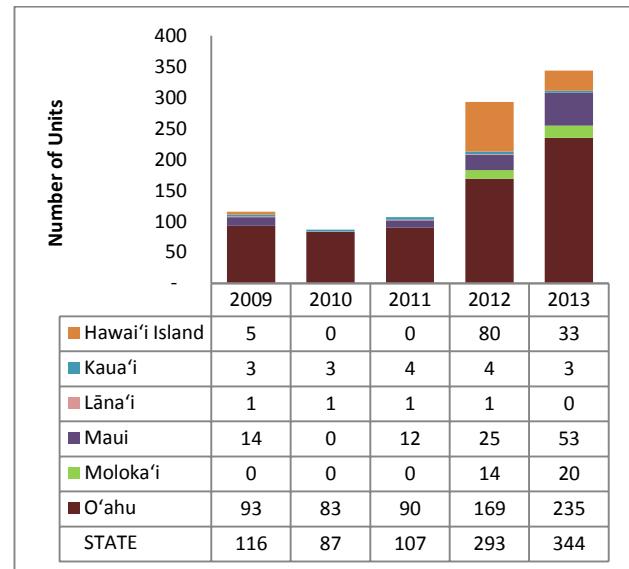

Figure 33: B&B – Inventory by Island (Properties)

Apartment/Hotels

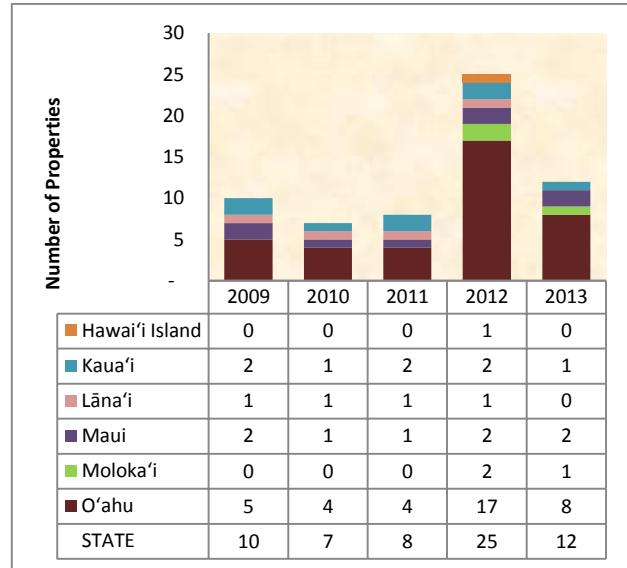

The number of units classified as apartment-hotels increased sharply in 2013 (from 293 to 344). Growth was strongest on O'ahu. In 2013 the number of apartment hotel properties fell to 12.

Figure 34: Apartment/Hotel – Inventory by Island (Units)

Hawaii Island's 33 apartment hotel units in 2013 were not located in properties classified as apartment hotels.

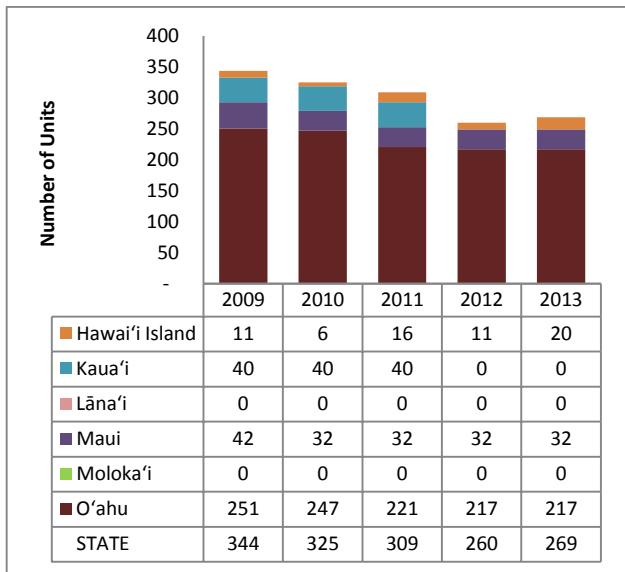

Figure 35: Apartment/Hotel – Inventory by Island (Properties)

Hostels

Data collection for the 2013 VPI confirmed that there were 9 hostels in Hawai'i and 269 hostel units. The number of hostel properties fell by one since 2012 and the number units rose by 9 from 260 to 269. All hostel units were located in properties classified as hostels. Approximately 80 percent of hostel units were located on the island of O'ahu.

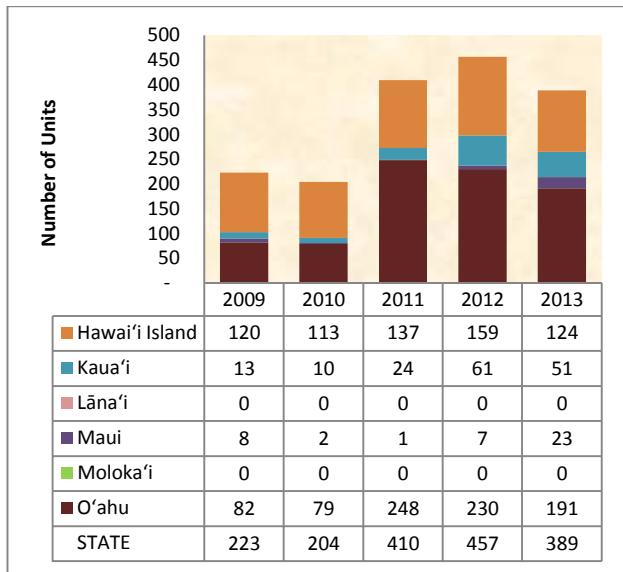

Figure 36: Hostel – Inventory by Island (Units)

Other

The number of “other” units decreased 15 percent, from 457 in 2012 to 389 in 2013. The number of properties in this classification remained stable after 2012, but survey reports showed decreases in the number of units at those properties. The objective for 2014 will be to continue decrease the number of properties and units in this category.

Figure 38: Other – Inventory by Island (Units)

2012 figures for Hawai'i Island and 'Oahu revised.

APPENDIX

Appendix A: Visitor Plant Inventory Tables

Appendix A is a set of eight tabulations taken from the Hawai'i Visitor Plant Inventory as of May 1, 2013. Table 1 presents an annual listing of inventory counts from 1965 to 2013. Tables 2 through 8 present inventory data for 2013 according to formats that exactly match inventory tables in past years. The tables include: inventory by island and property type, inventory by island and unit type, inventory by area and property type, inventory by area and unit type, price class of units by island, price class of units by type, and timeshare properties by island and area.

Table 1: Available Units by County, 1965 to 2013⁵

| Year | State Total | % Change | Hawai'i Island | % Change | Kaua'i | % Change | Maui County | % Change | O'ahu | % Change |
|------|-------------|----------|---------------------|----------|--------|----------|-------------|----------|---------------------|----------|
| 1965 | 12,903 | | 865 | | 776 | | 1,231 | | 10,031 | |
| 1966 | 14,827 | 14.9% | 1,387 | 60.3% | 860 | 10.8% | 1,497 | 21.6% | 11,083 | 10.5% |
| 1967 | 17,217 | 16.1% | 1,790 | 29.1% | 1,115 | 29.7% | 1,714 | 14.5% | 12,598 | 13.7% |
| 1968 | 18,657 | 8.4% | 2,188 | 22.2% | 1,260 | 13.0% | 2,043 | 19.2% | 13,166 | 4.5% |
| 1969 | 22,801 | 22.2% | 2,480 | 13.3% | 1,914 | 51.9% | 2,415 | 18.2% | 15,992 | 21.5% |
| 1970 | 26,923 | 18.1% | 3,166 | 27.7% | 2,565 | 34.0% | 2,743 | 13.6% | 18,449 | 15.4% |
| 1971 | 32,289 | 19.9% | 3,435 | 8.5% | 2,628 | 2.5% | 3,695 | 34.7% | 22,531 | 22.1% |
| 1972 | 35,797 | 10.9% | 4,241 | 23.5% | 2,719 | 3.5% | 4,095 | 10.8% | 24,742 | 9.8% |

Appendix B: Planned Additions to Visitor Plant Inventory, 2013 - 2014

The tables that follow present the best estimate of the number of visitor plant units that were under construction, obtained the necessary permits, or are currently pending by County planning departments in 2013.

Data for Hawai'i County was given for 2013 (Table 9), as was Kaua'i County (Table 10), Maui County (Table 11), and Honolulu County (Table 12).

Table 9: Planned Additions and New Developments – County of Hawai‘i

| Hawai‘i County | | | | |
|-----------------------------|--------------|------------------------|------------|---------------------------------------|
| Name of Applicant | Planned Type | Total Units in Project | District | Notes |
| Kurt McCarley | B&B | 4 | Puna | USE Approved |
| David Cox & Micheal Corbitt | B&B | 4 | South Kona | Special Purpose Permit (SPP) Approved |
| Terri J. Dolan | B&B | 4 | North Kona | Special Purpose Permit (SPP) Approved |
| Garvin & Laura Goode | B&B | 3 | South Hilo | Special Purpose Permit (SPP) Approved |
| Edward Staak | B&B | 2 | Puna | USE Approved |

2013 Visitor Plant Inventory List of Properties

Property list begins on the following page. Note for the list are shown below.

Explanation of Categories

- Island = Island on which the property is located
- Area = Area of the island where the property is located
- Name = Name of property
- Type = Unit Type¹⁴
- Available Units = Number of units available for visitor use
- Opened = Year property first opened
- Survey Year = Last year for which a VPI survey was received.

Class

- B Number of visitor units classified as Budget (Up to \$100 per night)
- S Number of visitor units classified as Standard (\$101 to \$250 per night)
- D Number of visitor units classified as Deluxe (\$251 to \$500 per night)
- L Number of visitor units classified as Luxury (Over \$500 per night)
- N/A Not available

Last Response

- 2013 Survey form received in 2013.
- 2012 No response received in 2013, information received in 2012
- 2011 No response received in 2013, information received in 2011
- 2010 No response received in 2013, information received in 2010

IVU Notation

In 2013, web-based searches identified many IVU units located in condominium hotels. For the grand majority, unique property names and unit numbers were not available and the units were identified only by the property name associated with the condominium hotel property. These units are properly classified here as IVU units and are listed separately from the condominium hotel property.

¹⁴ IVU* denotes IVU-House/Villa/Cottage

Appendix C: Definitions

A property may include more than one **type of unit**. **Property type** is the unit type with the highest count.

Apartment / Hotel (Apt/Hotel): Inexpensive units (usually in a low-rise building) equipped with kitchens and geared for long-term rentals. Front desk operations and maid service are usually limited and sometimes non-existent.

Bed & Breakfast (B&B): A lodging facility with a limited number of guest units, which include breakfast in the daily rental rate. Typical bed and breakfast facilities are either small, quaint inns, or family homes.

Condominium Hotel (Condo Hotel): A multi-unit property legal classified as a condominium with each unit individually deeded. Generally, units are collectively placed into transient hotel rental operations, offering most of the services of a hotel, such as daily maid service and front desk operations. Condominium units are usually larger than hotel units and include studios and one- to three-bedroom units, with kitchen and laundry facilities, geared for transient use of 30 days or less.

Hotel: A multi-unit lodging facility which provides room accommodations on a daily basis and generally, but not always, restaurant operations and other "away from home" services such as daily maid service and front desk operations. Includes condominiums if a single owner owns all units and the property is operated as defined here.

Hostels: An inexpensive, limited service facility, often with dormitory-style accommodations, appealing primarily to younger travelers.

Individual Vacation Unit (IVU): An individual vacation unit can be classified as an IVU-condominium unit (not in a hotel rental operation), and IVU-house, villa, or cottage with very limited service, often with only basic cleaning supplies provided, or an IVU-cabin unit.

They can also be reported as unclassified and are listed as an individual vacation unit.

Timeshare: A timeshare is a kind of property ownership that allows guests to acquire a percentage of interest in a hotel unit, condominium/hotel, bed and breakfast, individual vacation home, etc. For a specific period of time on a recurring basis. This share could be one week per year (i.e. 1/52 share) or more; some resorts offering one week every other year (1/104 share) or four weeks per year (1/13 share).

The survey questionnaire asks for information on the number of units registered as timeshare and units operated as timeshare. The number of units registered includes those that are available for sale as well as those currently in use by visitors. The number of units operated represents the units that have been sold and are used.

Other: Includes residential condominium units, timeshare units, motels, lodges, inns, or any other form of property not included in the above definitions.

Class of Unit: The Visitor Plant Inventory survey also included questions about the class of units at each property. The subsequent tables showed the percent of each class of units available by island. Units were classified as follows:

ClassPrice Range / Rack Rate

| | |
|----------------|--------------------------|
| Budget..... | Up to \$100 per night |
| Standard | \$101 to \$250 per night |
| Deluxe..... | \$251 to \$500 per night |
| Luxury | Over \$500 per night |

Appendix D: Methods

The 2013 Visitor Plant Inventory presents the results of HTA's enumeration of visitor accommodations in Hawai'i. The data were collected from September 2012 through January 2013, and thus reflects inventories for each property at the time of contact.

Visitor Plant Inventory Survey: Information about transient accommodations was gathered mainly from a survey of existing visitor accommodation properties and management companies. Survey forms were sent to general managers, property managers and other individuals who could provide information about the property. The survey provided information about available units, planned additions and other information presented in this report.

Survey forms were distributed to all properties that participated in the prior year's survey and additional properties identified through the association survey (below) and internet research. Over 2,200 properties were identified as part of a detailed web search using pertinent key word phrases, such as "Vacation Units In Hawai'i , " "Hawai'i B&B," "Hawai'i Hostels," etc. As was the case for the 2011 VPI, this search was expanded to include additional research related to private homes which may be available for transient rental, especially those located in resort residential areas.

Survey forms were distributed via mail, email, and fax. If no response was received, follow-up telephone calls, emails, and/or faxes were made to the property to remind them to complete and return the form. Subsequently, if no response was received after the follow-ups, an Internet search was conducted to determine if the property was still in business and telephone calls were made to verify unit counts and types. If no response was received or no data was found on the Internet, but information was available from prior years, that information was included and so noted. If no response was received from a property and information was available from the association survey, such information was included and so noted. If no survey form was returned and no information was available from previous years or other sources, the property was listed as a non-respondent.

Association Survey: Continued in 2013, this survey's purpose was to gather contact information

of associations whose members were transient visitor accommodations in the State of Hawai'i. Letters were sent to these associations to request member accommodation contact information, from which the mailing list was updated and new accommodations were contacted via mailing as described above.

Timeshare Properties: Information on timeshare properties were gathered through the survey questionnaire, which asked for information on the number of units registered as timeshare and units operated as timeshare. The number of units registered included those that were available for sale in a timeshare program (as well as those already sold in such a program). The number of units operated represented the units that were in use. Certain timeshare properties have the ability to split a given registered timeshare unit into more than one operated visitor unit (i.e. it may be possible for a two-bedroom unit to be rented as two keys: one studio unit and one 1-bedroom unit).

The listing of timeshare inventory presented in Table 8 has been re-stated with registered units representing the number of units that were available to be sold as part of a timeshare program and operated units were defined as number of salable keys that were operated for visitor use. In some cases, the number of operating units exceed the number of registered units for a given timeshare property.

The available timeshare units listed in Tables 3 and 5 and their related charts were the total number of operated units. The number of timeshare properties listed in Tables 2 and 4 were the properties with the majority of units classified as timeshare. However, the number of available units listed with the timeshare category included those units that were cross-listed under the other property types. The 2012 current Visitor Plant Inventory details the unit types available at each property.

Starting with the 2009 VPI, certain timeshare operators reported their inventory counts in terms of individual guest rooms (keys) rather than timeshare units previously reported. For example, a two-bedroom timeshare unit may, depending configuration, be rented separately as two guest rooms: a one-bedroom unit and as a studio unit. This change in reporting procedure resulted in a higher inventory count for certain timeshare

properties, but did not necessarily reflect a change in the physical plant.

Cross Verification of Data: Where applicable, cross-verification was attempted against data received from the four counties, including real property classifications, bed and breakfast license data, and transient vacation unit (TVU) license data.

As of September 2010, Maui County Code 3.48.305 section C, recently amended by ordinance No. 3766, requires condominium associations to file an annual report to the Real Property Tax division declaring the actual use of all units within their project, before December 1 of each calendar year. Units are to be identified as apartment, commercial, home owner, hotel/resort, and timeshare. This data was used in the estimation of overall timeshare and IVU-condo units for a given project.

Unit Type Classification: Each unit reported in the survey was assigned a unit type based on HTA's type definitions (found in Appendix E). For the purposes of classification, a given property may include more than one unit type. Historically, type classifications were self-selected by the respondent but research has shown that the response was not always consistent with HTA's type definitions. In

such cases, the unit type was corrected for the 2012 VPI report.

Notably, many respondents classified their units as condominium hotel due to the units' location within a condominium building, but did not have the services or amenities included in HTA's definition for a condominium hotel. These units were reclassified as individual vacation units.

Property Type Classification: Classification of property type (Tables 2 & 4) for properties with more than one unit type was determined by the majority of units on that property. Historically property type was self-selected by the respondent but research has shown that the response was not always consistent with HTA's type definitions.

Planned New Developments: Information about planned new developments was gathered with assistance from the four county Planning Offices. The information was reprinted here and includes projects and developments that have achieved some level of jurisdictional approval. That was to say, these developments were a step beyond the preliminary stages of development and have some "official" standing as planned developments.

Appendix E: Survey Forms

AUTHORITY

Please review the existing data we have for your property, which is listed in the column labeled "2012." If the data is correct as of May 1st, 2013 simply check the box, and sign and date below. If the data is erroneous or needs to be revised, please provide the correct information in the second column and then sign and date. **Definitions for each property type are listed in the Property Type Definition Sheet on the back of this survey.** Please return the form to SMS Research & Marketing Services in the postage paid business reply envelope provided. For further information or clarification, please contact SMS at (808) 537-3356. **Mahalo for your cooperation!**

If the data listed for 2012 is correct as of May 1st, 2013, please check this box and sign and date below.

Definition Sheet

Property Type Definition Sheet

| | |
|---------------------------------------|---|
| Apartment / Hotel | Inexpensive units (usually in a low-rise building) equipped with kitchens and geared for long-term rentals. Front desk operations and maid service are usually limited and sometimes non-existent. |
| Bed & Breakfast (B&B) | A lodging facility with a limited number of guest units, which include breakfast in the daily rental rate. Typical bed and breakfast facilities are either small, quaint inns or family homes. |
| Condominium Hotel | A multi-unit property legally classified as a condominium with each unit individually deeded. Generally, units are collectively placed into transient hotel rental operations, offering most of the services of a hotel, such as daily maid service and front desk operations. Condominium units are usually larger than hotel units and include studios and one- to three-bedroom units, with kitchen and laundry facilities, geared for transient use of 30 days or less. |
| Hotel | A multi-unit lodging facility which provides room accommodations on a daily basis and generally, but not always, restaurant operations and other "away from home" services such as daily maid service and front desk operations. Includes condominiums if a single owner owns all units and the property is operated as defined here. |
| Hostel | An inexpensive, limited service facility, often with dormitory-style accommodations, appealing primarily to younger travelers. |
| Individual Vacation Unit (IVU) | An individual condominium unit (not in a hotel rental operation), house, cabin, villa or cottage with very limited service, often with only basic cleaning supplies provided. |
| Timeshare | A timeshare is a kind of property ownership that allows guests to acquire a percentage of interest in a hotel unit, condominium/hotel, apartment/hotel, bed and breakfast, individual vacation home etc. for a specific period of time and on a recurring basis. This share could be one week per year (i.e. 1/52 share) or more; some resorts offering one week every other year (1/104 share) or four weeks per year (1/13 share). The survey questionnaire asks for information on the number of units registered as timeshare and units operated as timeshare. The number of units registered includes those that are available for sale as well as those currently in use by visitors. The number of units operated represents the units that have been sold and are used. |
| Other | Includes motels, lodges, inns, or any other form of property not included in the above definitions. |
| Owner-Occupied | Units not available for transient visitor use (30 days or less). |
