## INTRODUCTION

The year 1999 was one of change for the collection and presentation of visitor statistics. First, the Hawaii Tourism Authority (HTA) was formed and developed a strategic plan that focused marketing efforts on more specific geographical areas. Eight major geographical markets were specified and the Convention Center was also established as a focus for marketing efforts. In order to support the HTA's marketing plan, visitor statistics needed to be refined and supplemented to provide adequate data on these specific markets.

Second, the Legislature assigned to the Department of Business, Economic Development and Tourism (DBEDT) the responsibility for gathering tourism statistics and providing them to both the HTA and the public. The Research and Economic Analysis Division (READ) was delegated responsibility to organize a tourism research and statistics program, building on the dedicated work over many decades of the Hawaii Visitors and Convention Bureau's Research Department. READ undertook an extensive review of visitor data sources and methodology. In order to provide the HTA with marketing data relevant to its market focus, new sources of statistics were developed and changes in methodology and presentation of the data were made. This process included a complete review of previous data sources and methodologies and extensive consultation with researchers and other users of visitor statistics.

The result is a more comprehensive set of statistics about Hawaii's visitors that better meets the HTA's marketing needs and also provides researchers and other users with more information about visitors than has previously been available. However, the increase in detail and comprehensiveness has required some reorganization of the way statistics are presented. This report provides updated statistics on visitors through 1999 based on new data collection methods and categories of presentation. Some discussion of the revisions is provided to help the reader better understand the differences between new and previous categories. For a more extensive discussion of the differences and rationale behind the changes, the reader is referred to the upcoming November 2000 issue of the DBEDT publication *Hawaii's Economy*. The publication will also be placed on the Department's web site at <http://www.hawaii.gov/dbedt>.

### **Major Market Areas (MMA)**

The first difference most users of visitor statistics will notice is a change from the broader categories of *Eastbound* and *Westbound* directions of visitor travel to *Major Market Areas*, or MMAs. This reorganization follows the HTA's segmentation of the world into specific geographical markets that will be targeted with marketing efforts to make the State more globally competitive. The MMA's are:

1. U.S. West – Pacific and Mountain States
2. U.S. East – Other States in the Continental U.S.
3. Japan
4. Canada

5. Europe – United Kingdom, Germany, France, Italy, and Switzerland
6. Oceania – Australia and New Zealand
7. Other Asia – China, Hong Kong, Korea, Singapore and Taiwan
8. Latin America – Argentina, Brazil and Mexico

By default, the 9<sup>th</sup> area consolidates all other geographical areas.

9. Other – All countries and districts not listed in MMA 1 to 8 above, including Guam, Puerto Rico, U.S. Virgin Islands, and other U.S. territories.

A final area of special marketing emphasis is the new convention center.

## 10. Hawaii Convention Center

### **Domestic-International vs. Eastbound-Westbound**

The second major difference is the organization of overall visitor data into *Domestic* and *International* points of origin, replacing the former breakdown of *Eastbound* and *Westbound* directions of travel. (The new, Domestic-International breakdown has been recalculated backwards to 1951 in order to provide a consistent, long-term time series of data for research purposes.)

The previous segmentation of visitors into two major directions of travel, Eastbound and Westbound, was based on sources of data available when the categories were first established many decades ago. The Westbound category included arrivals from the major foreign market of Canada along with arrivals from the U.S. mainland. Eastbound included flights from Asia, the Pacific Islands, Australia and New Zealand.

The market-specific focus of the HTA has required READ to develop better data on the residence of visitors. The best source for data on the residence of foreign visitors is the Immigration and Naturalization Service (INS), which monitors the status of persons entering the U.S. from foreign countries. However, the INS does not maintain information on whether Canadian visitors have arrived on Eastbound or Westbound flights. This made the previous, Eastbound-Westbound distinction difficult to maintain. The new Domestic-International categories, on the other hand, reflect the two major sources of data --INS for counts of visitors from foreign points of origin and domestic in-flight survey results for domestic points of origin.

### **Other Changes**

In addition to a reorganization of the statistics, revisions were also made to past data. New information from the U.S. Customs Service has been used to improve the distinction between visitors and returning residents aboard international flights. This information was used to revise 1998 and 1999 visitor counts. New information from the INS was also used to revise counts for individual countries. Historical data were adjusted to be consistent with the new methodologies.

# SUMMARY OF 1999 VISITORS TO HAWAII

1999 ANNUAL VISITOR RESEARCH REPORT

## OVERVIEW

The contrast between strong U.S. economic growth and uncertainty in the Japanese economy in 1999 continued to be reflected in the visitor statistics for Hawaii's three largest MMAs --U.S. West, U.S. East and Japan. Other Asian economies began to see improved rates of economic growth in 1999, enough to show increased visitor days over 1998 but not enough to meet or exceed 1998 spending levels. The Canadian market performed very well in 1999 in terms of both expenditures and visitor presence.

Visitors spent approximately \$10.3 billion in 1999, virtually unchanged from the previous year (-0.3%). Despite a 4.5 percent increase in total visitor days, overall expenditures were held back by a decline in average daily spending.

### **Total Expenditures**

Significant increases in expenditures by visitors from the U.S. West, U.S. East, and Canada in 1999 were countered by a sharp decline in expenditures by Japanese visitors. The U.S. West became the largest market in terms of expenditures, accounting for nearly 30 percent of the total. The sharp increase in expenditures by the U.S. East market pushed them ahead of the Japan market, into second place. Japanese expenditures followed in 3<sup>rd</sup> place, continuing a declining trend over the past few years. These three MMA's accounted for 79.1 percent of all expenditures in the visitor industry for 1999.

### **Visitor Days**

The *Visitor days* statistic is calculated by multiplying visitor arrivals by the average length of stay and is a more comprehensive measure of visitor presence in Hawaii than arrivals. A 2.2 percent increase in both visitor arrivals and length of stay pushed total visitor days up sharply over 1998. Canada saw the sharpest increase (31.1%), largely due to increasing lengths of stay. A drop in arrivals from Japan pulled total Japanese visitor days down by nearly 9 percent.

U.S. West visitors made up the largest share (37.3%) of visitor days due to the large number of visitors and relatively long stays. Although there were fewer visitors from the U.S. East than from Japan, U.S. East ranked second in visitor days (27.3%) because of their long length of stay (10.27 days). Japanese visitor days comprised 17.3 percent of the total, while Canadians accounted for nearly 6 percent of total visitor days.

### **Per Person Per Day Spending**

Overall average spending per person per day fell by nearly 5 percent in 1999. Only the U.S. West and Canadian visitors spent significantly more per day in 1999 than in 1998; all others either spent essentially the same amount or less.

Despite the sharp decline (-11.8%) in the average Japanese per person per day spending, the Japanese still had the highest rate at \$227.30 per day. Oceania followed at \$194.20

per day, and Other Asia at \$192.70 per day. The Europeans, U.S. West, and Canadian visitors spent the least per day at \$135.40, \$135.60 and \$143.10, respectively. These figures do not include spending on airfare to and from Hawaii.

### **Per Person Per Trip Spending**

Spending per person per trip also declined, but thanks to increasing lengths of stay, the decline was less than for per day spending.

Given their long average length of stay, Canadian visitors spent the most per trip, \$1,897.20 on average. This was closely followed by U.S. East visitors at \$1,708.00. U.S. West and Japanese visitors spent the least per trip.

### **Island Visitations**

**Island of Oahu:** Oahu saw a 9.5 percent increase in total visitor days for 1999 (TABLE 4), with the largest increase coming from the international segment (12.1%).

International visitor arrivals actually declined by 7.0 percent. However, this decline was more than offset by a 20.5 percent increase their average length of stay -- nearly an entire extra day. Domestic visitor days increased 7.6 percent in 1999 with both the number and length of stay contributing to the increase. Oahu hosted nearly 73 percent of all international visitor days in the state for 1999 but only 39 percent of domestic visitor days. The number of visitors on Oahu for the average day in 1999 (the *average daily visitor census*) was 79,497 (TABLE 6).

**Islands of Maui, Molokai and Lanai:** Maui Island's count of visitor days for 1999 increased 3.7 percent. The increase was solely based on increasing arrivals from the domestic market (6.2%) which offset a decline in international visitor days of 8.9 percent. Maui Island's average daily visitor census was 41,918. The island accounted for more than a quarter of total visitor days spent in Hawaii and more than 30 percent of all domestic visitor days. In fact, domestic visitors spent more days on Maui (7.20) than on any other island.

Data for Molokai and Lanai showed declines in domestic and international visitor days for both islands in 1999. However, it must be noted that the margin of survey error for those two islands is quite high.

**Island of Hawaii:** After posting strong growth in 1998, visitor days on the island of Hawaii fell 5.2 percent in 1999. Length of stay for both domestic and international visitors declined for Hawaii Island in 1999. The only increasing category was a 1.7 percent increase in arrivals for the domestic market. The average daily visitor census was 22,736. Hawaii has the largest proportion of international visitor days among the neighbor islands, 20.1 percent of the total compared to 14.7 percent and 9.0 percent respectively for Maui and Kauai.

**Island of Kauai:** Visitor days increased 1.7 percent on Kauai in 1999 as a healthy, 8.5 percent increase in domestic visitor days was swamped by a 37.7 percent decline in the international count of visitor days. The drop in international visitor days came largely from declines in Japanese and Canadian visitor days. Kauai accounted for 14.1 percent of the State's total domestic visitor days, but only 3.5 percent of international visitor days. The average daily visitor census was 18,214.

### **Monthly Visitation Pattern**

July was the busiest month in 1999, with an average of 188,059 visitors present per day. December, the peak month in 1998, ranked fourth busiest in 1999 probably due to Y2K concerns. In general, the winter months (December, January and February) and the late summer months (July and August) handled the most visitors.

### **Visitor Characteristics**

**First-time/repeat:** First-time visitor arrivals increased by nearly 5 percent in 1999, boosting the share of this market to 41.1 percent of total arrivals (TABLE 2). The share of first-time visitors was larger in the international market (50.2%) as compared to the domestic market (35.8%). The average number of trips for all visitors was approximately 4. The heaviest repeater market was the U.S. West in which 75.3 percent of visitors indicated that they had been to Hawaii before (TABLE 13). Japan, other Asia, and Europe MMAs had more first-time than repeat visitors.

**Meetings, Conventions and Incentive Travel:** In 1999, 484,751 visitors came to Hawaii to attend meetings, conventions or were on incentive trips, up 7.3 percent from 1998 (TABLE 2). A strong 17.2 percent increase in Conventions and Conferences in this category offset a 14.7 percent decline in Incentive travel. Most of the increase in the category can be traced to conventions and conferences from the domestic market. The domestic growth was due to a myriad of smaller events and a few large events including the October 1999 American Dental Association Convention. However, the highest percent increase was registered by the International Conventions and Conferences subcategory, which increased 23.4 percent from 1998.

**Honeymooners:** Romance continued to provide an important reason for travel to Hawaii, with 661,767 visitors arriving here on their honeymoon or for weddings. The 11.6 percent increase over the previous year was primarily driven by the strong international market.

**Cruises:** Nearly 90,000 visitors flew here to board cruise ships. The bulk of the cruise passengers came from the domestic market. In addition to the visitors that flew here to board a cruise ship, another 44,755 arrived here on foreign cruise ships.

# VISITOR CHARACTERISTICS BY MAJOR MARKET AREAS

1999 ANNUAL VISITOR RESEARCH REPORT

## VISITOR CHARACTERISTICS BY MMA

### U.S. West

As the largest of the MMAs in terms of total expenditures, visitor days, and visitor arrivals, the U.S. West continued to be Hawaii's core market with healthy growth in 1999. Spending per person per day increased by 2.4 percent to \$136 per day. Still, that level remains among the lowest of all the MMAs. Length of stay was relatively flat at 9.71 days. Among other highlights in the U.S. West:

- Although it remains a heavy repeat market with 75.3 percent of visitors having visited more than once, the U.S. West also saw a sizable increase in first-time visitors (7.2%).
- As in previous years, approximately half of these visitors go to Oahu, and the other half exclusively stay on the neighbor islands.
- Fewer U.S. West travelers came on group tours in 1999, but travel packages and independent travel grew.
- Only 53.9 percent of U.S. West visitors stayed in hotels in 1999, while 29.4 percent stayed in condominiums.
- Convention travel from the U.S. West market increased by 17.0 percent over 1998, making it one of the fastest growing segments of travel to Hawaii from the market.
- U.S. West visitor arrivals tend to peak in the summer and moderate during the winter months.

Almost all of Hawaii's 2.3 million U.S. West visitors arrive from domestic points of origin. Only about 100,000 arrive from international points. California's 1.36 million visitors dominate the U.S. West visitor count at 61.1 percent of the market. Washington and Oregon are the next largest with approximately 300,000 and 150,000 visitors, respectively. California is also the largest single state market accounting for 31.9 percent of domestic visitors and 20.9 percent of total visitors to Hawaii.

### U.S. East

A strong growth in arrivals for the U.S. East (6.1% over 1998), coupled with a long length of stay (10.23 days) and relatively high expenditures per day (\$167 per visitor) pushed the U.S. East market past Japan and into second place for total expenditures in Hawaii for 1999.

In addition:

- Growth in U.S. East convention travel was especially high, up 21.2 percent from 1998.
- Nearly half of U.S. East visitors were first-timers in 1999. Moreover, the rate of growth for U.S. East first-time visitors was faster than for repeat visitors (6.7% vs. 5.6%).
- The increase in U.S. East visitors was felt on all islands particularly the neighbor islands. Nevertheless, Oahu still hosted 60.7 percent of U.S. East visitors.

- U.S. East visitors are more likely than their U.S. West counterparts to stay at hotels.
- U.S. East visitors are more or less evenly spaced throughout the year except for slightly higher proportions in the winter and summer months.

The U.S. East's 1.6 million visitors are also predominantly from domestic points of origin, with only about 83,000 arriving on international flights. The largest sub-market in the U.S. East is the East-North-Central Region (375,000 visitors). This area includes Illinois, Indiana, Michigan, Ohio, and Wisconsin. Strong arrivals were also seen in the Mid-Atlantic Region (New Jersey, New York and Pennsylvania) and the West-South-Central-Region (including Texas among others). Both the South Atlantic and the West-North-Central Regions registered more than 10 percent growth for 1999.

## **Japan**

Total Japanese visitor expenditures fell in 1999 due to declines in both arrivals and daily visitor spending. The length of stay held steady at 5.68 days. With the decline, Japan slipped to third largest among the MMAs in terms of total expenditures. However, the Japanese were still the highest spenders per day at \$227 per visitor.

In addition:

- A decline in repeat visitors pushed the share of first-time visitors to 51.5 percent of the Japan market.
- Nearly all Japanese (95.9%) visit Oahu and for 73 percent Oahu is the only island visited.
- Most Japanese visitors come on group or package tours.
- Close to 90 percent of Japanese visitors stay in hotels.
- An impressive 19.5 percent of Japanese visitors come here for a wedding or honeymoon. There were 15.9 percent more Japanese visitors here for that purpose than 1998, the only category in this market showing an increase in 1999.
- July, August, and September are the most popular months for Japanese visits.

Of the 1.8 million Japanese visitors to Hawaii, fewer than 50,000 arrived from domestic points of origin. Of those arriving on international flights, 65.7 percent were from three central Japan regions, Kanto (which includes Tokyo), Kinki (including Kyoto and Osaka) and Chubu (including Nagoya).

## **Canada**

Hawaii experienced an exceptional year for tourism from Canadian in 1999. Increases in arrivals, average length of stay, and per person per day spending, drove up total expenditures in this market by 38.5 percent. Canadians, on average, stayed in Hawaii for 13.26 days, the longest among Hawaii's visitor groups. Average daily visitor spending increased by 5.7 percent but remained third lowest among the MMAs at \$143.

- A driving force for the overall increase in the Canadian market was the first-time visitor segment, which registered an 18.4 percent increase from 1998 and accounted for 41.6 percent of Canadian arrivals.
- True independents made up the largest component of these visitors.
- In contrast to the Japan market, more than 70 percent of Canadian visitors go to at least one neighbor island. About as many Canadians go to Maui as Oahu.
- About 60 percent of Canadians stayed in hotels, with 28.0 percent staying in condominiums.
- The Canadian visitor market is very seasonal. This is especially true for Canadians flying direct from Canada or from other international destinations. Hawaii sees relatively few Canadians from May through September.

While most Canadians flew into Hawaii direct from Canada or from other international destinations, a fair share (nearly 15 percent) flew to Hawaii from U.S. cities.

## **Europe**

Although arrivals from Europe increased in 1999, total expenditures fell because of a sharp decline in spending per person per day. Europeans spent the least of all groups per day in 1999. Length of stay also dropped slightly, but still remained high at nearly 12 days.

- The majority of Europeans were first-time visitors, but a surprising 44.0 percent were repeat visitors. Europeans averaged two previous trips to Hawaii.
- Many Europeans made their travel arrangements independently, though a significant number purchased packages for at least their air and hotel arrangements.
- Nearly 65 percent of Europeans visited Oahu. Maui was the next most popular destination, capturing 41.0 percent of European visitors.
- Europeans primarily came to Hawaii for pleasure, but those who came for conventions increased by 15.4 percent in 1999.
- Approximately 70 percent of European visitors stayed at hotels.
- August, September, and October were the most popular months for Europeans (especially those from the United Kingdom and Germany).

The bulk of Europeans flew to Hawaii via U.S. cities. Germany and the United Kingdom make up 80 percent of the visitors from the Europe MMA.

## **Oceania — Australia and New Zealand**

A decline in the average length of stay reduced the total expenditures of visitors from Australia and New Zealand slightly in 1999, despite an increase in arrivals. Nevertheless, this market remained a relatively high spending one (\$194.2 per person per day) and long-staying (8.46 days).

- The share of first-time visitors dropped dramatically from this market in 1999, although first-timers were still in the majority.

- True independents fell as a share of total while those on air and hotel packages increased.
- More than 85 percent of visitors from this region visited Oahu, but neighbor island travel has become more popular.
- The bulk of travelers from this market stayed in hotels.
- Most visitors came for pleasure, with sharp increases in honeymooners. All types of business travel also increased.
- June through October was the most popular period for travel to Hawaii.

Most Australian and New Zealand visitors came from international cities. Approximately 72 percent of this market were Australian residents.

### **Other Asia**

Expenditures from the Other Asia MMA declined in 1999. In particular, there was a sharp drop in the average per person per day spending and length of stay. Arrivals, on the other hand, increased by 13.2 percent.

- The number of first-time visitors increased by 43.5 percent while repeat visitations fell. This boosted the share of first-time visitors to 71.2 percent for this MMA.
- Group tours and package trips were the most common form of travel for this group.
- Most of the visitors from this region spent their time in the State on Oahu only, but travel to Maui and the Big Island showed some growth.
- Hotels were by far the most prevalent form of accommodations for Other Asians.
- Honeymoon/weddings and meetings, conventions and incentives showed the largest increases, but the bulk of travelers came for pleasure.

The share of those coming from international points to Hawaii increased sharply in 1999, but a surprising 31.1 percent of the visitors from Other Asia came to Hawaii from a U.S. point of origin. The largest number of visitors in the other Asia MMA came from Taiwan (42,703). Korea was in second place (39,263) followed by China (27,466).

### **Latin America**

Visitor expenditures of Latin Americans arriving on flights from the Mainland U.S. in 1999 increased despite a decline in the number of visitor days, arrivals and average length of stay in 1999. The compensating factor was spending per person per day, which rose dramatically for this MMA (32.2%), to \$172.80 in 1999.

- First-time visitors continued to be the majority among Latin Americans visiting Hawaii, although the share was down from 1998.
- Latin American visitors purchasing group or tour packages also declined from 1998.
- Oahu was the most popular Island for Latin American visits (72.6%) followed by Maui and the Big Island.
- The majority of visitors from this MMA (73.1%) stayed in hotels.

- Pleasure trips continued to be the primary purpose of travel for visitors from this market (79.5%), and 10.2 percent of Latin American visitors were on their honeymoon.

There were no respondents from Latin America in DBEDT's survey of international travelers. Therefore, visitor characteristics from Latin America arriving on international flights were not available. Other sources indicate that there were a small number of international travelers from this MMA. However, they have been included in Other MMA due to the lack of more specific information such as length of stay, etc.

# VISITOR EXPENDITURES BY CATEGORY

1999 ANNUAL VISITOR RESEARCH REPORT

## VISITOR EXPENDITURES BY CATEGORY

Although total visitor arrivals and visitor days increased in 1999, total visitor expenditures in the State remained about the same at \$10.3 billion for the year. Due to some changes in methodology, the 1999 categories of entertainment, transportation and "all other" spending are not comparable to 1998 data (see footnote on TABLE 49). For categories that are comparable, declines occurred in food and shopping with the others showing some increases.

Lodging showed a 1.8 percent increase. This increase was consistent with slight increases in both the average hotel occupancy rate and the average daily room rate in 1999. Excluding supplemental business spending, lodging accounted for a little more than 30 percent of the total expenditures of visitors.

The overall declines in the food and shopping categories were very modest. However, there was a significant decline in the fashion component of shopping that can partly be attributed to the Japan market.

### Visitor Spending Patterns by Major MMAs

**Domestic U.S. West.** Spending per day for Domestic U.S. West visitors (\$140) declined slightly between 1998 and 1999. The composition of spending shifted noticeably however, with more money allocated to food and shopping and less spent on lodging. Lodging accounted for about one-third of the expenditures of these visitors and shopping about 16 percent. Domestic U.S. West visitors spent more on eating and drinking than on shopping.

**Domestic U.S. East.** Domestic U.S. East visitors spending per day (\$177) increased from 1998 with the composition of spending changing. In contrast to their counterparts from the western states, U.S. East visitors spent more on lodging in 1999 (up 12%). About 38 percent of daily per person spending by U.S. East visitors was on lodging. Shopping for fashion declined by nearly 15 percent to slightly more than \$20 per day.

**International Japanese.** International Japanese visitor spending fell by 12 percent in 1999 but was still a relatively high, \$230 per day. Declines occurred in most categories, but the drop was especially felt in shopping, which makes up more than a third of daily expenditures by this market. Despite the drop in shopping expenditures, the Japanese spent roughly three times as much per day shopping than visitors from the U.S. Japanese daily visitor spending on lodging put that market between the amounts spent by the U.S. West and U.S. East markets. Total per day spending on food for Japanese visitors was similar to the other two major MMAs.

## **Technical Notes**

It must be noted that total lodging expenditures from the visitor surveys are higher than total revenues based on the transient accommodations tax. The lodging expenditures reported by visitors include taxes and tips, and may also include other purchases at the hotel. They also included payments for short-term rent of apartments and houses that may not be covered by the TAT. Timeshare visitors, who do not purchase lodging, were most likely included in condominium visitors, which may slightly overstate total lodging expenditures. Surveys in 2000 included timeshare as an option and should address this overstatement in the future. For both 1999 and 1998, total expenditures take into account the 16 percent of domestic and 9 percent of international visitors who did not stay at hotels during their vacation in Hawaii.

Due to a methodological change in 1999, some of the data are not comparable across categories between 1999 and 1998. In particular, tour packages purchased in Hawaii were not allocated across categories and now appear in the miscellaneous category. Thus the miscellaneous category is relatively high in 1999 as compared to 1998 while other categories, including entertainment and transportation are relatively low. This change is significantly more important in Japanese expenditures where tours are more widely used. Also, subcategories in shopping may have been affected by the inclusion of an "Other Shopping" subcategory in 1999.

<b>Supplemental Business Spending</b>	<b>435.7</b>	<b>398.9</b>	<b>9.2%</b>

NC: Not comparable.

1/ Prior to 1999, the value of inter-island tour packages purchased in Hawaii by international visitors was reallocated, mainly to entertainment and transportation. Due to methodological considerations the value of these packages has not been reallocated at this time for 1999 and rather is contained in the "ALL Other/Miscellaneous" category. For this reason the affected categories are not comparable between these two years.

2/ NA (Not applicable) Reflects a change in the questionnaire for 1999.

# APPENDIX

1999 ANNUAL VISITOR RESEARCH REPORT

## **SOURCES OF DATA FOR VISITOR STATISTICS**

The data in this report come from ten sources:

1. Monthly passenger counts for each airline,
2. International visitors by country of residence from the U.S. Immigration and Naturalization Service (INS),
3. International visitor counts by visa type from the INS, Honolulu office,
4. U.S. Customs declaration forms,
5. An International Intercept Survey at the Honolulu International Airport,
6. A Domestic in-flight survey of passengers on flights originating in the Mainland U.S.,
7. Honolulu International Airport billing records,
8. A Visitor Expenditure Survey for domestic visitors,
9. Honolulu and Hilo Harbor cruise ship passenger counts, and
10. A Visitor Plant Inventory survey (refer to DBEDT's 1999 Visitor Plant Inventory Report).

Act 156 of the 1998 Hawaii State Legislature created the Hawaii Tourism Authority (HTA) and reassigned the responsibility for compiling and maintaining official visitor statistics to the Department of Business, Economic Development, and Tourism (DBEDT). The HTA's draft strategic plan formulated a new marketing strategy based on ten Major Marketing Areas (MMAs). The more targeted approach to marketing required changes in the visitor research program. Additionally, new sources of data allowed for further refinements.

The most visible change in the visitor data for most Users has been a switch from compiling visitor arrivals and related characteristics on an Eastbound/Westbound direction-of-travel basis to a Domestic/International point-of-origin basis. This switch was made necessary by the adoption of INS data as the primary source of information on foreign arrivals. Additionally, new data sources provide more reliable estimates of the newly established MMAs, returning U.S. residents and Canadian visitors. All attempts have been made to make data comparable across years.

### **Airline Passenger Counts**

Every airline (both chartered and scheduled) reports passenger counts each month to DBEDT. Those passenger counts provide the total number of arriving passengers. Visitor counts are derived by subtracting the estimated in-transit passengers, returning Hawaii residents, and intended residents as measured by the U.S. Customs Declaration Forms and domestic in-flight surveys.

### **U.S. INS, Washington, D.C.**

Monthly reports from the Washington, D.C. offices of the U.S. Immigration and Naturalization Service, provide counts of international visitors to Hawaii by their country of residence. The reports also identify those simply passing through Hawaii. Canadian and U.S. residents are not included in these counts.

### **U.S. INS, Honolulu**

Monthly reports from the INS Honolulu office provide counts of Canadian visitors and U.S. citizens coming on flights from international cities.

### **U.S. Customs Declaration Forms**

All Customs Declaration Forms are systematically pulled for 10 days in each month to determine the number of returning Hawaii residents on international flights. The forms are also used to determine the city of residence of those living on the U.S. mainland. (This survey does not collect names or addresses or other personally identifying information.)

### **International Intercept Survey**

The international intercept survey provides information on international visitor characteristics such as length of stay, island visitation patterns, accommodations, etc. The survey also collects information on visitor expenditures. It is distributed to a systematic sample of passengers in the boarding area and walkways at the Honolulu International Airport. In 1999, a total of 40,885 such surveys were completed and processed.

### **Domestic Survey**

The domestic survey form is on the reverse side of the Hawaii State Department of Agriculture's mandatory declaration form. The dual-sided form is distributed to passengers on all flights from the mainland U.S. to Hawaii every day of the year. Hawaii-bound air carriers from the U.S. mainland reported carrying 5,088,781 passengers in 1999, excluding in-transit passengers who are only in Hawaii for a few hours. In 1999, there were 1,523,268 usable forms collected and processed. Each form represented an average party of 2.1 visitors, for a total of 3,198,863 surveyed passengers, which accounted for 62.9 percent of total passengers. The characteristics of respondents were attributed to non-respondents as well. All Usable forms were optically scanned and tabulated to produce the results presented here.

### **Honolulu International Airport Billing Records**

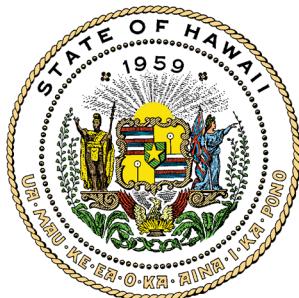

The billings records show the number of passengers on flights from Canada who were pre-cleared in Canada and not included in the INS, Honolulu reports.

### **Domestic Visitor Expenditure Survey**

Approximately 2,000 surveys a month are sent to the place of accommodation of domestic visitors to obtain daily expenditure patterns. Only visitors who stay at least four days are selected. In the past, the survey was sent to hotels and condominiums only. Beginning in 1999, the survey was sent to all types of accommodations. In 1999, there were 3,088 Usable forms collected and processed.

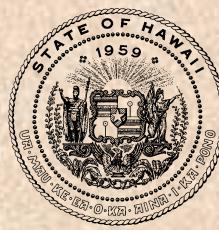

### **Honolulu and Hilo Harbor Cruise Passenger Counts**

All cruise ships entering Honolulu Harbor and Hilo Harbor report passenger counts to the Department of Transportation, Harbors Division. DBEDT estimates counts for Maui and Kauai based on this information. The DBEDT numbers specifically look at the number of passengers arriving in the state on cruise ships. Visitors flying to Hawaii and then boarding the cruise vessel are captured in the surveys of air passengers.
