The purpose of this study is to measure and evaluate the effectiveness of the marketing efforts conducted by marketing concerns under contract with the Hawai‘i Tourism Authority.

This study, conducted since 2003, provides insight into the overall intention to travel to Hawai‘i, brand valuation, and measurement of specific, separate attributes for Hawai‘i’s major marketing areas of U.S. West, U.S. East, Canada and Japan.

The major goals of this study are to understand:

• Consideration of Hawai‘i as a destination
• Importance of key attributes
• Preference for Hawai‘i
• Preference for Hawai‘i by behavioral segments
• Opinions of Hawai‘i vs. Competitive destinations for each major marketing area:
  – Eastern U.S. (Florida, Costa Rica, Puerto Rico, California, Mexico, Caribbean, Las Vegas and Europe)
  – Western U.S. (Alaska, Costa Rica, Australia, Mexico, Caribbean, Las Vegas and Europe)
  – Canada (Florida, Arizona, Australia, California, Mexico, Caribbean, Las Vegas and Europe)
  – Japan (Australia, China, Guam/Saipan, Korea, Europe, Taiwan, Singapore, Thailand, Hong Kong)

In addition, the study tracks data on the topics as well:

• Intention to/or actual visits to Hawai‘i
• Hawai‘i travel patterns and visitor profiles (Accommodations, Length of Stay, Frequency, Satisfaction)
• Indication of reasons for not intending/considering Hawai‘i
Online surveys of approximately 15 minutes in length conducted between October 15, 2015 and November 2, 2015 and between March 24, 2016 and March 30, 2016. Each survey was presented in the language of the surveyed country or was localized, if necessary, for countries where English is the primary language.

Qualified respondents from each major marketing area were required to meet specific requirements for inclusion in this study:

- Eastern U.S.
  - Have taken a Leisure trip by air of 500 miles or more in the past 12 months
  - Household income of USD $75,000 or more
  - 18 years of age or older

- Western U.S.
  - Live in the states of Alaska, California, Oregon, Washington, Arizona, Colorado, Idaho, Montana, Nevada, New Mexico, Utah and Wyoming
  - Have taken a Leisure trip by air of 500 miles or more in the past 12 months
  - Household income of USD $75,000 or more
  - 18 years of age or older
**Research Objectives**

- **Canada**
  - Live in the provinces of British Columbia, Alberta and Saskatchewan
  - Have taken a Leisure trip by air of 500 miles or more in the past 12 months
  - Household income of CDN $75,000 or more
  - 18 years of age or older

- **Japan**
  - Live in Japan
  - Have taken and international Leisure trip in the past 24 months
  - Household income of ¥2,000,000
  - 18 years of age or older

Respondents who indicated they intend to travel to Hawai‘i within then next 24 months will be re-contacted in October 2017 and March 2018 to determine if a trip was actually made. Actual re-contacts may be lower than reported here due to attrition in the panel.

Respondents are as follows:

<table>
<thead>

**RESEARCH OBJECTIVES**

For some analyses respondents are segmented depending on how they responded to questions regarding the importance of certain destination characteristics they consider when making travel decisions. Following are the definitions for each segment. Respondents must have provided a rating of 4 or 5 for at least one characteristic in each segment.

*Segments were revised with Wave 1 in November 2015, thus no prior wave data is presented.*

_DKS&A_
RESEARCH OBJECTIVES

Inclusion in each segment is based on the responses for each attribute within the segment, thus a respondent may respond to more than one characteristic across multiple segments. Therefore, while the response is counted only once, the respondent may be counted multiple times. Sample sizes for each segment are shown in the table below.

<table>

</table>
Data will be presented in five major sections. The first section includes a Summary of the current Wave (MAR 2016), comparing relevant data from each of the four market areas. This will be followed by detailed data for each market area – Eastern U.S., Western U.S., Canada and Japan showing each of the past 4 waves (NOV 2014, MAR 2015, NOV 2015, and MAR 2016) separately, except for Destination Attributes as they apply to Hawai’i specifically. For these charts, data is presented for all waves back to Q2 of 2009. The exact wording of the survey question used to compile each chart is included at the bottom of each chart within the individual market area sections.

Excluding the Summary section, charts in each set of the market sections appear in the identical order. Since the Summary section includes only data that can be compared across all markets, some charts have been excluded; the progression, however is maintained. Charts in each market section appear in the following order:

- Demographics – Age
- Demographics – Median Age
- Demographics – Income
- Demographics – Median Income
- Demographics – Sexual Orientation
- Demographics – Long Distance Overnight Trips in Past 12 Months (Past 24 Months for Japan)
- Demographics – Median Number of Long Distance Overnight Trips in Past 12 Months (*Past 24 Months for Japan*)
- Destination Consideration for Next Leisure Vacation
- Reasons for Taking a Leisure Vacation
- Attributes Important in Choosing a Destination
- Attributes Important in Choosing a Destination (Importance vs. Applies to Hawai’i)
- Attributes Important in Choosing a Destination – Segment Comparisons
• Destination Attributes – Competitive Comparisons (competitive destinations vary by market)
• Destination Attributes – Applies to Hawai‘i
• Impression of Hawai‘i
• Impression of Hawai‘i by Segment
• Hawai‘i Visitation by Segment
• Hawai‘i Planned Visitation by Segment
• Visitation – Competitive Destinations
• Planned Visitation – Competitive Destinations
• Planned Visitation to Islands of Hawai‘i
• Planned Accommodations
• Planned Accommodation Location
• Reasons for Not Visiting Hawai‘i
• Lifetime Visits to Hawai‘i
• Reasons for Returning to Hawai‘i
• Reasons for Returning to Hawai‘i – Segment Comparisons
• Year Last Visited Hawai‘i
• Month Last Visited Hawai‘i
• Islands’ Share of Nights in Hawai‘i
• Number of Nights in Hawai‘i
• Average Spending in Hawai‘i
• Travel Party Size
• Travel Party Composition
• Hawai‘i Excellent Rating
• Likelihood of Returning to Hawai‘i
Executive Summary

• Canadians are still the oldest, remaining consistent with an average age of 47. Eastern travelers are right behind Canadians inching up to 46 years of age. Western travelers are the youngest at 40 (a decrease from previous waves) while Eastern U.S. slightly increased to 46 and Japanese travelers hold steady at 44 years.

• Travelers to Hawai‘i from all markets tend to be more affluent as their average annual household incomes exceed the national averages in each of their respective countries. In the U.S., incomes for travelers from the Eastern part of country has remained constant and highest among all travelers. The incomes of Western U.S. travelers have risen however, while Canadian and Japanese average incomes have declined.

• Although the percentage is low, LGBT travelers are more likely to come from the Eastern U.S. than from any of the other geographies.

• All travelers in this study claim to have taken at least 2 long distance overnight trips in the past 12 months, but those from the Eastern U.S. have taken the most with an average of 2.65, followed by the Western U.S. at 2.31 trips.

• Hawai‘i is in the most considered leisure destination among Western U.S. travelers and is tied for number two among Canadian and Japanese travelers. Among Eastern U.S. travelers Hawai‘i has moved up from number seven to number six in consideration behind the Caribbean, Florida, California, Las Vegas, and Other destinations. It is interesting to note that, for U.S. residents, international destinations including European destinations and fallen down in the list, which may be an indication of travelers reactions world events.

• The top reasons U.S. residents travel is to explore and do new things and to spend more quality time with their spouses or families. Both Canadian and Japanese travelers consider travel as a chance to rest and relax. Canadians also like to explore and do new things, while Japanese travelers like to experience other cultures.
Executive Summary

• Among the 20 attributes (22 for the Japan market) important in choosing a leisure destination, Hawai‘i meets or exceeds expectations among all visitors as a great place to get away from it all; among U.S. and Canadian visitors as being romantic; among Canadian, Japanese and Western U.S. visitors as a good place for family and children; among Canadian and Japanese visitors as offering experience with native people and their culture; and among Japanese visitors as, a great place for shopping and ease of communicating in the travelers native language.

• While there is variance among the markets, most have the consistent impression that Hawai‘i is able to deliver high levels of recreational activities (including water sports, zip lining, snorkeling, hiking, biking, etc.), relaxation and romance, and State or National parks and beaches. Shopping also continues to be rated highly among the Japanese market.

• Around 20% of visitors from all markets, excluding the Eastern U.S., have visited Hawai‘i in the past 12 months with an additional 13% to 21% visiting in the past 24-36 months. Only 6% of Eastern U.S. visitors have visited in the past 12 months with an additional 8% visiting the past 24-36 months.

• U.S. visitors are most likely to visit Hawai‘i in the Spring or Summer, however Fall and Winter are not far behind. Canadians overwhelmingly prefer to visit Hawai‘i in the Winter, while visitors from Japan seem to prefer Summer and Spring.

• Nearly 3 out of 10 visitors from the Western U.S and Japan plan to visit Hawai‘i in the next 12 months with an additional 14% - 19% planning to visit in the next 13-24 months. Over 30% of Canadian and 14% of Eastern U.S. travelers plan to visit in the next 12 months. The primary reason Eastern U.S. visitors seem to be lagging behind the other markets is the cost of airfare as well as the time a trip to Hawai‘i from the Eastern U.S. requires. They feel they can get a better value at other destinations.

• Among those who are planning to visit the State, Maui is on the top of the list, except for Japanese visitors who overwhelmingly plan to visit O‘ahu followed by Hawai‘i. This is likely due to their high opinions of the shopping in Hawai‘i. Oahu is fourth for the Eastern U.S. and Canadian visitors. An opportunity exists to lure those planning to visit Hawai‘i to islands other than O‘ahu and Maui as about a quarter of U.S. and Canadian travelers have not yet decided which islands they plan to visit on their next trip.
Executive Summary

• Visitors from all markets primarily plan to stay in a hotel. Visitors from Canada, however, are the least likely travelers to stay in a hotel and the most likely to stay in a condo. It is not surprising that the majority of all traveler groups plan to stay at a resort location. Japanese visitors seem to be the most diverse with more than the other groups planning to stay in urban and rural locations.

• As might be expected, at five visits, travelers from the Western U.S. have made the most lifetime visits to Hawai’i, followed by Japanese visitors at just over four lifetime visits and Canadian visitors at slightly less than four. Visitors from the Eastern U.S. have only made just over three visits to Hawai’i in their lifetimes.

• Visitors from all four markets keep returning to Hawai’i because of its stunning natural beauty, the great weather and great beaches. They also feel it is safe and they love to experience the culture.

• Just over half of U.S. visitors are couples, while a quarter of Japanese and Canadian visitors travel as families.

• At about $4,400, visitors from Japan and Canada spent the most on their last trip to Hawai’i. Large travel parties may be the reason for the high spending among these groups. The amount spent on shopping may also be a factor for Japanese visitors as twice as much of their travel dollar goes to shopping as any other group. Their longer length of stay – about 11 days is likely contributing to the high spend by Canadians. Western U.S. visitors spend the least overall - about $2,700.

• Visitors from all four markets rate their last visit to Hawai’i higher than 6 on an excellence scale of 8 and between 24% and 32% say they are very likely to return in the next 24 months. About half of the Eastern U.S. visitors say they are somewhat or very likely to return to Hawai’i in the next 24 months.
Q53. Which of the following categories includes your age?
Respondents were asked to provide Annual Household Income in the currency of their country. Following are the Average Household Incomes of respondents from each region or country.

- **Eastern U.S.** (U.S. Dollars) $143,000
- **Western U.S.** (U.S. Dollars) $139,000
- **Canada** (Canadian Dollars) $129,000
- **Japan** (Japanese Yen) ¥811

Travelers to Hawai’i tend to be more affluent as their Average Annual Household Incomes exceed the national averages in each of their countries.

**QS4.** Which of the following categories includes your total household income?
Q55. Do you consider yourself to be: LGBT, Heterosexual, Prefer not to answer
Q1. How many overnight leisure trips of 500 miles or more have you taken by air in the past 12 months?
