HTA Resident Sentiment Survey 2018 Highlights
Resident sentiment toward Hawai‘i’s tourism industry is vital to maintaining sustainable growth in the industry and in the state’s economy overall.

The primary objectives of the Resident Sentiment Survey research are:

- To track key resident attitudes toward tourism in Hawai‘i over time.
- To identify perceived positive and negative impacts of the tourism industry on local residents.
- To identify for the tourism industry and HTA, issues or concerns regarding tourism expressed by residents.
What’s the Big Idea?

1. With the visitor industry well on its way to its seventh consecutive year of record arrivals (i.e., during the time this survey was fielded), residents largely continued to view the industry favorably, but some indicators of Hawai‘i Resident Sentiment had weakened.

2. Overall, residents understand the economic benefits of tourism. However, with arrivals approaching the 10 million mark, they seek benefits beyond the economic, a greater return on their “investment”.

3. *Having a Voice in Tourism Development*, *Presenting Native Hawaiian Culture Authentically* and *Preserving Native Hawaiian Culture* are the keys to improving Resident Sentiment.
Sample Plan and Methodology

Sample Plan
OmniTrak used a region-based stratified sampling for the study, the same approach used in earlier Resident Sentiment Survey efforts conducted by OmniTrak. The sampling plan divided the State into 12 sub-regions with consideration to population proportion, and allocated sufficient sample for each area to achieve an acceptable sampling error. Within each region, data was collected randomly. The resulting sample of residents was weighted proportionate to population distribution per the latest State Census from the State of Hawai‘i Department of Business, Economic Development and Tourism. The telephone sample includes both landline (82%) and cellular (18%) phones.

Statewide sampling produced a total of \( n = 1,635 \) respondents as follows:
- O‘ahu: 609
- Hawai‘i Island: 451
- Maui County: 375
- Kaua‘i: 200

Methodology
- A mixed methodology was used for this survey, including a combination of Computer Assisted Telephone Interviews (CATI) and online surveys. Just over four-in-ten (41%) respondents completed the survey via telephone and the remainder (59%) completed the survey online.
- All calls were placed from OmniTrak’s continuously quality-controlled calling center in the Davies Pacific Center building in Downtown Honolulu.
- Field Dates: August 27 to October 14, 2018
Key Resident Sentiment Indicators – Impact of Hawai‘i Tourism

Q1. Using a 10-point scale where 10 means Extremely Favorable and 1 means Not Favorable at All, please give me your opinion of tourism as an industry in Hawai‘i.

Q2a/b. Using a 10-point scale where 10 means Extremely Positive and 1 means Extremely Negative, how would you rate the overall impact tourism has on...The State as a whole/You and Your Family?

Q4.1. Using a 10-point scale where 10 means Completely Agree and 1 means Do Not Agree at All, how much do you agree or disagree that... Tourist has brought more benefits than problems?
Q2b. Using a 10-point scale where 10 means Extremely Positive and 1 means Extremely Negative, how would you rate the overall impact tourism has on you and your family?
Impact of Tourism on You & Your Family

Q2b. Using a 10-point scale where 10 means Extremely Positive and 1 means Extremely Negative, how would you rate the overall impact tourism has on you and your family?
