HTA Resident Sentiment Survey 2019 Highlights
Resident sentiment toward Hawai‘i’s tourism industry is vital to maintaining sustainable growth in the industry and in the state’s economy overall.

The primary objectives of the Resident Sentiment Survey research are:

- To track key resident attitudes toward tourism in Hawai‘i over time.
- To identify perceived positive and negative impacts of the tourism industry on local residents.
- To identify for the tourism industry and HTA, issues or concerns regarding tourism expressed by residents.
What’s the **Big Idea?**

With Hawai’i’s visitor industry heading toward its eighth consecutive year of record visitor arrivals to the state, resident sentiment has generally weakened, though the key indicators showed mixed results.

The visitor industry’s impact on residents’ overall quality of life becomes key to improving resident sentiment, as resident attitudes shift toward seeking an equal balance of Economic/Social and Cultural/Community benefits from the industry.

To improve resident sentiment – a key part of responsible growth for the state’s visitor industry:

1. Provide residents with a voice in tourism development
2. Create jobs with opportunities for advancement
3. Create shopping, restaurants and entertainment opportunities
Sample Plan and Methodology

Sample Plan
OmniTrak used a region-based stratified sampling for the study, the same approach used in earlier Resident Sentiment Survey efforts conducted by OmniTrak. The sampling plan divided the State into 12 sub-regions with consideration to population proportion, and allocated sufficient sample for each area to achieve an acceptable sampling error. Within each region, data was collected randomly. The resulting sample of residents was weighted proportionate to population distribution per the latest State Census from the State of Hawai‘i Department of Business, Economic Development and Tourism. The telephone sample includes both landline (26%) and cellular (15%) phones; and an online component (59%).

Statewide sampling produced a total of n = 1,707 (i.e., up from 1,635 in 2018) respondents as follows:
- O‘ahu: 683 (+74 from 609 in 2018 to increase sample from North Shore area)
- Hawai‘i Island: 451 (Same)
- Maui County: 373 (-2 from 375 in 2018)
- Kaua‘i: 200 (Same)

Methodology
- A mixed methodology was used for this survey, including a combination of Computer Assisted Telephone Interviews (CATI) and online surveys. Just over four-in-ten (41%) respondents completed the survey via telephone and the remainder (59%) completed the survey online.
- All calls were placed from OmniTrak’s continuously quality-controlled calling center in the Davies Pacific Center building in Downtown Honolulu.
- Field Dates: Online: September 27 to November 12, 2019; Phone: September 28 to November 14, 2019
Key Resident Sentiment Indicators – Impact of Hawai‘i Tourism

Q2a/b. Using a 10-point scale where 10 means Extremely Positive and 1 means Extremely Negative, how would you rate the overall impact tourism has on... The State as a whole/You and Your Family?

Q4.1. Using a 10-point scale where 10 means Completely Agree and 1 means Do Not Agree at All, how much do you agree or disagree that...Tourist has brought more benefits than problems?
Impact of Hawai‘i Tourism

Q3. I’m going to read you some ways tourism may affect your island, please tell me how much you agree or disagree with each statement using a scale of 1 to 10 with 10 being Completely Agree and 1 being Do Not Agree At All?
**Impact of Hawai‘i Tourism**

Q3 & Q4. I’m going to read you some ways tourism may affect your island, please tell me how much you agree or disagree with each statement using a scale of 1 to 10 with 10 being Completely Agree and 1 being Do Not Agree At All?
