Resident Sentiment Survey Spring 2022 Highlights

Prepared for the:
State Department of Business, Economic Development & Tourism: Project #5808
August 2022

Fielded: May 7 through July 30, 2022
What’s the **Big Idea**?  

**Fall 2021 Resident Sentiment Recap**

1. **The Great Reset**: Awareness of HTA Tourism Management efforts is rising, setting the stage for results.

2. **The Current Setting**: Resident sentiment weakens slightly in Fall 2021, though residents say tourism is worth the issues associated with it.

3. **The Next Chapter**: As awareness of tourism management efforts rises, they are gaining support and influence in improving resident sentiment.
What’s the Big Idea?

1. The Great Reset Begins: Early signs of strengthening resident sentiment are appearing.

2. The Current Setting: Residents who are aware of tourism management efforts are generally more positive towards Hawai‘i tourism, though awareness of such efforts is relatively low.

3. The Next Chapter: To fuel further improvement in resident sentiment, continue to implement/build awareness of tourism management efforts, along with the economic/quality of life benefits of tourism.
The Great Reset: Early signs of strengthening resident sentiment are appearing
High-level Resident Sentiment indicators show improvement

Q5. In your opinion, what problems do you think tourism has created in Hawai‘i?
“Impact of Tourism on You & Your Family” holds steady

In order to track the data (change in rating scale) from 2009 on a rating of 7-10 was used to approximate the percent that felt positively about this statement.

Q2b. Using a 10-point scale where 10 means Extremely Positive and 1 means Extremely Negative, how would you rate the overall impact tourism has on...you and your family?
“This island is being run for tourists at the expense of local people” holds steady

In order to track the data (change in rating scale) from 2009 on a rating of 6-10 was used to approximate the percent that felt positively about this statement.

Q4. Using a 10-point scale where 10 means Completely Agree and 1 means Do Not Agree at All, how much do you agree or disagree that...?
Balance: Negative Impacts/Tourism Management Indicators

**Negative Impacts**
- Island is run for tourists at expense of local people
- Island economy is too dependent on tourism

**Tourism Management**
- More effort is being made to balance economic benefits of tourism and quality of life for residents
- Tourism is being better managed on my island
- I have a voice in my island's tourism development decisions

Background Information: Research Objectives, Sample Plan & Methodology
Research Objectives

- Resident sentiment toward Hawai‘i’s visitor industry is vital to maintaining Responsible and Regenerative Growth in the industry and in the state’s economy overall.
- The Resident Sentiment Survey (RSS) has been conducted 19 times since 1999, and the current survey was conducted by Omnitrak Group, Inc. The primary objectives of the RSS research are:
  - To track key resident attitudes toward tourism in Hawai‘i over time.
  - To identify perceived positive and negative impacts of the visitor industry on local residents.
  - To identify for the visitor industry and HTA, issues or concerns regarding tourism expressed by residents.
  - To explore resident perceptions on ideas to “manage” or mitigate the negative impacts associated with tourism.

Statistical Analysis – Within the reports’ graphs and tables, a box or shaded area shows a statistically significant difference across columns (e.g. islands or attributes) in the same year at the 95% level of confidence.

An arrow ↑ or ↓ indicates a statistically significant difference when ratings are compared across years at the 95% confidence level.
Sample Plan and Methodology

Sample Plan
Omnitrak used a region-based stratified sampling for the study, the same approach used in earlier Resident Sentiment survey efforts conducted by Omnitrak. The sampling plan divided the State into 12 sub-regions with consideration to population proportion, and allocated sufficient sample for each area to achieve an acceptable sampling error. Within each region, data was collected randomly. The resulting sample of residents was weighted proportionate to population distribution per the latest State Census from the state Department of Business, Economic Development and Tourism.

Statewide sampling produced a total of n = 1955 respondents as follows:
- O‘ahu: 839
- Hawai‘i Island: 458
- Maui County: 403
- Kaua‘i: 255

Methodology
- A mixed methodology was used for this survey, including a combination of Computer Assisted Telephone Interview (CATI, 33%) and online surveys (67%).
- All calls were placed from Omnitrak’s continuously quality-controlled calling center in the Davies Pacific Center building in Downtown Honolulu.
- Field Dates: May 7 through July 30, 2022
